Sebagai organ pengawas, Dewan Komisaris memandang pemantauan terhadap efektivitas Sistem Pengendalian Internal sebagai elemen krusial dalam menjaga integritas tata kelola SGN. Pemantauan yang dilakukan secara berkala memungkinkan identifikasi dini atas potensi kelemahan, sehingga langkah korektif dapat segera diambil untuk menjaga keandalan operasional Perseroan.

Sistem Pelaporan Pelanggaran

SGN mengimplementasikan *Whistleblowing System* (WBS) sebagai mekanisme pelaporan bagi pihak internal maupun eksternal untuk menyampaikan dugaan pelanggaran terhadap prinsip GCG maupun nilai etika Perseroan. Sebagai bentuk komitmen terhadap perlindungan pelapor, SGN menetapkan mekanisme pengamanan yang mencakup jaminan kerahasiaan identitas, pencegahan tindakan balasan, serta transparansi dalam proses tindak lanjut laporan.

Based on this evaluation, the Board of Commissioners assessed that SGN had performed proper risk management during 2024 and contributed to achieving sustainable performance.

Internal Control System

As the supervisory body, the Board of Commissioners considers monitoring the effectiveness of the Internal Control System as a crucial element in maintaining the integrity of SGN's governance. Regular monitoring results in early identification of potential weaknesses, such that corrective measures can be taken immediately to maintain the reliability of the Company's operations.

Whistleblowing System

SGN implemented the Whistleblowing System (WBS) as a reporting mechanism for internal and external parties to submit allegations of GCG violations and the Company's ethical values. To protect whistleblower, SGN shows commitment by establishing a security mechanism that assures identity confidentiality, prevention of retaliation, and transparency in the report follow-up process.

The Board of Commissioners considers the WBS is an effective supervisory instrument in preventing potential fraud and maintaining the workplace integrity. Throughout 2024, the Board of Commissioners also reviewed the special audit result gathered from WBS complaints. Based on the supervision conducted, the Board of Commissioners considers that the system has been managed effectively by the Board of Directors. Tinjauan Ekonomi dan Industri

Pertumbuhan ekonomi global pada tahun 2024 diperkirakan berada pada kisaran 3,2%, dengan potensi melambat menjadi 2,9% pada 2026. Kondisi ini dipengaruhi oleh ketegangan geopolitik yang terus berlanjut, terutama akibat konflik Rusia–Ukraina, perang dagang Amerika Serikat–Tiongkok, dan arah kebijakan moneter yang masih ketat di sejumlah negara maju. Ketidakpastian global tersebut turut menekan stabilitas perdagangan dan memperbesar risiko fluktuasi harga energi dan pangan dunia. Meski demikian, kawasan Asia tetap menjadi motor utama pertumbuhan global, dengan Tiongkok, India, dan Indonesia mencatatkan pertumbuhan ekonomi yang positif di tengah tekanan eksternal.

Inflasi global pada awal tahun 2024 tercatat sebesar 4,6%, lebih rendah dibandingkan 8% pada tahun sebelumnya, seiring dengan mulai stabilnya harga energi dan pangan. Di Indonesia, laju inflasi tetap terkendali, dengan capaian *year-on-year* sebesar 2,75% pada Januari 2024, masih dalam batas sasaran Bank Indonesia sebesar 2–4%. Sepanjang tahun berjalan, pertumbuhan ekonomi domestik mencapai 5%, menunjukkan ketahanan fundamental ekonomi nasional di tengah perlambatan global. Di sisi lain, bauran kebijakan fiskal dan moneter tetap diarahkan untuk menjaga stabilitas makro dan mendorong produktivitas sektor riil, termasuk sektor pertanian dan industri pangan sebagai penopang utama ekonomi domestik.

Respected Shareholders and Stakeholders,

The year 2024 was an important momentum for PT Sinergi Gula Nusantara (SGN or SugarCo) in reaffirming its position as a strong and competitive sugarcane agribusiness company. In the midst of challenging external dynamics, SugarCo managed to record an impressive financial performance, by posting a net profit of IDR531.21 billion by the end of December 2024. This achievement represented a significant growth of 2,378% compared to the profit in 2023, and exceeded the 2024 WPB-R target by 1,267.77%. The increase was supported by a 132% surge in annual revenue, as well as operational optimization strategies that were consistently implemented across all business lines.

The annual report serves as a form of management accountability for 2024 strategic achievements as well as a reflection of the Company's commitment to drive sustainable growth in line with the corporate vision and mission. In addition, the Company's Financial Statements have been independently audited by the Public Accounting Firm Rintis, Jumadi, Rianto & Rekan and received a "present fairly, in all material respects" opinion. Furthermore, as the Board of Directors, we submit the key points of the Supervisory Report on the implementation of SugarCo's operations and governance throughout the 2024 financial year.

Economic and Industry Overview

Global economic growth in 2024 is estimated around 3.2%, with the potential to slow down to 2.9% in 2026. The circumstance is largely influenced by ongoing geopolitical tensions, particularly the Russia-Ukraine conflict, the US-China trade war, and the tightening of monetary policy in several developed countries. The global uncertainties also pressured trade stability and increased the risk of fluctuations in global energy and food prices. Nevertheless, Asia remains the key driver of global growth, with China, India, and Indonesia recorded positive economic growth despite external pressures.

Global inflation in early 2024 is recorded at 4.6%, lower than 8% in the previous year, as energy and food prices began to stabilize. In Indonesia, the inflation rate remained under control with year-on-year realization of 2.75% in January 2024, within Bank Indonesia's target range of 2-4%. Throughout the year, domestic economic growth reached 5%, showing the resilience of national economic fundamentals amid the global slowdown. On the other hand, the fiscal and monetary policy mix remained directed at maintaining macro stability and boosting real sector productivity, including the agricultural sector and food industry as the main pillars of the domestic economy.

Sektor pertanian, khususnya subsektor tebu dan industri gula, memainkan peran penting dalam mendukung ketahanan pangan nasional. Pemerintah melalui Peraturan Presiden Republik Indonesia No. 40 Tahun 2023 mendorong percepatan swasembada gula dan penyediaan bioethanol sebagai bahan bakar nabati. Kebijakan ini bertujuan untuk memperluas areal tanam, meningkatkan produktivitas dan rendemen tebu, serta memperkuat ekosistem petani dan hilirisasi produk. Pada tahun 2024, produksi gula nasional diperkirakan mencapai 2,38 juta ton, meningkat dari 2,27 juta ton pada tahun sebelumnya. Namun demikian, tantangan struktural seperti rendahnya produktivitas lahan dan keterbatasan teknologi pengolahan masih menjadi hambatan utama yang perlu diatasi.

Sebagai pelaku utama dalam transformasi industri gula nasional, SGN terus mengakselerasi inisiatif perbaikan menyeluruh, mulai dari penguatan kemitraan petani, modernisasi pabrik gula, hingga peningkatan efisiensi logistik. Realisasi kinerja operasional tahun 2024 menunjukkan tren yang sangat positif, dengan total tebu digiling sebesar 11,98 juta ton dan produksi gula eks tebu mencapai 851,22 ribu ton. SugarCo sendiri berhasil memproduksi gula dengan rendemen rata-rata 7,09%. Secara finansial, SugarCo mencetak laba bersih sebesar Rp531,21 miliar hingga akhir 2024, melonjak signifikan dibandingkan tahun 2023 dan melampaui target RKAP-P sebesar 1267,77%. Capaian ini menjadi tonggak penting yang mencerminkan ketahanan usaha dan efektivitas strategi bisnis yang dijalankan.

Ke depannya, prospek industri gula nasional masih menjanjikan, terutama jika diiringi dengan konsistensi kebijakan pemerintah, peningkatan investasi pada teknologi agroindustri, serta komitmen pelaku usaha untuk memperkuat aspek keberlanjutan. SugarCo optimistis bahwa melalui sinergi antara transformasi operasional dan agenda ketahanan pangan nasional, Perseroan dapat mengambil peran yang semakin strategis dalam mendukung kemandirian gula Indonesia.

The agricultural sector, particularly the sugarcane subsector and the sugar industry, plays an important role in supporting national food security. The government, through Presidential Regulation No. 40/2023, encourages the acceleration of sugar self-sufficiency and the provision of bioethanol as biofuel to expand planting areas, increase productivity and sugarcane yields, as well as strengthen farmer ecosystems and downstream products. In 2024, national sugar production was estimated to reach 2.38 million tons, up from 2.27 million tons in the previous year. However, structural challenges such as low land productivity and limited processing technology are still the main obstacles to be overcome.

As a key player in the transformation of the national sugar industry, SGN pushes for comprehensive improvement initiatives, ranging from strengthening partnerships with farmer, modernizing sugar factories, to improving logistics efficiency. The realized operational performance in 2024 showed a very positive trend, with total sugarcane milled of 11.98 million tons and ex-sugarcane sugar production reached 851.22 thousand tons. SugarCo managed to produce sugar with an average yield of 7.09%. Financially, SugarCo scored a net profit of IDR531.21 billion by the end of 2024, a significant jump compared to 2023 and exceeded the WPB-R target by 1,267.77%. The achievement stood as an important milestone that reflects the resilience of our business and the effectiveness of our strategy.

Moving forward, the prospects for the national sugar industry are still promising, especially considering consistent government policies, increased investment in agro-industrial technology, and the industry commitment to strengthen sustainability aspects. SugarCo believes that the Company shall take on increasingly strategic role as the synergy between operational transformation and the national food security agenda supports Indonesia's sugar independence.

Target dan Realisasi Perseroan

Sepanjang tahun 2024, PT Sinergi Gula Nusantara menunjukkan kinerja yang solid dengan berhasil membukukan laba bersih sebesar Rp531,21 miliar. Capaian ini mencerminkan peningkatan signifikan sebesar 1267,77% terhadap target yang ditetapkan dalam RKAP-P 2024, yaitu Rp41,9 miliar, sekaligus melampaui realisasi tahun 2023 secara substansial. Peningkatan kinerja ini terutama didorong oleh lonjakan pendapatan sebesar 131,88% dibandingkan realisasi tahun sebelumnya, serta kontribusi dari efisiensi biaya dan peningkatan margin laba.

Pada sisi operasional, dari total 36 pabrik gula, sebanyak 31 unit menjalankan kegiatan giling hingga akhir tahun 2024, sementara 2 unit berada dalam status *standby* dan 3 unit lainnya dalam kondisi beku operasi. Volume tebu yang digiling mencapai 11,98 juta ton, dengan rata-rata rendemen 7,09%. Jumlah produksi gula secara keseluruhan mencapai 851,22 ribu ton, mengalami pertumbuhan jika dibandingkan dengan tahun sebelumnya, yang didorong oleh peningkatan produktivitas lahan dan efisiensi proses produksi.

Dari sisi keuangan, pendapatan konsolidasian Perseroan mencapai Rp4,98 triliun, meningkat 31,88% dibandingkan realisasi tahun 2023 sebesar Rp3,78 triliun. Peningkatan ini berasal dari penjualan gula sebesar Rp3,97 triliun atau setara 269,36 ribu ton dengan harga rata-rata Rp14.722/kg, serta penjualan tetes sebesar Rp1,01 triliun atau setara 407.080 ton. Secara finansial, SugarCo juga mencatat *net profit margin* sebesar 10,67%, jauh melampaui target RKAP-P 2024 yang hanya 0,62%.

Dari sisi investasi, realisasi investasi hingga akhir Desember 2024 mencapai Rp373,35 miliar atau meningkat 9,56% dibandingkan tahun sebelumnya. Namun, bila dibandingkan dengan RKAP-P 2024, capaian tersebut baru merepresentasikan 30,14% dari total rencana investasi, karena adanya beberapa *capital expenditure* (capex) yang belum terealisasi, khususnya yang bersumber dari pembiayaan Penyertaan Modal Negara (PMN). Sebagian besar investasi dialokasikan pada pembelian mesin dan instalasi sebesar Rp340,62 miliar, bangunan perusahaan sebesar Rp8,45 miliar, serta aktiva dalam konstruksi sebesar Rp13,88 miliar.

Tantangan dan Kendala yang Dihadapi Perseroan

Sepanjang tahun 2024, SGN menghadapi beragam tantangan yang memengaruhi stabilitas operasional dan pencapaian kinerja, baik dari sisi hulu (*on-farm*) maupun hilir (*off-farm*). Salah satu faktor eksternal yang memberikan tekanan terhadap kegiatan agribisnis adalah perubahan pola iklim. Setelah mengalami dampak signifikan dari El Niño pada tahun sebelumnya, kondisi cuaca ekstrem berlanjut pada tahun 2024 dengan munculnya indikasi La Niña pada paruh kedua tahun. Fenomena ini ditandai oleh peningkatan curah hujan di berbagai wilayah operasional SugarCo, yang berpotensi menimbulkan banjir lokal, genangan di lahan pertanian, serta gangguan logistik, dan

SOEs ecosystem, in order to produce increasingly resilient and competitive performance in the national sugar industry.

Company Target and Realization

Throughout 2024, PT Sinergi Gula Nusantara demonstrated a solid performance, successfully recording a net profit of IDR531.21 billion. This achievement reflects a significant increase of 1267.77% against the target set in the 2024 WPB-R of IDR41.9 billion, while substantially exceeding the 2023 realization. The performance improvement was mainly driven by a 131.88% surge in revenue compared to the previous year's realization, as well as contributions from cost efficiency and improved profit margins.

On the operational side, there were a total of 36 sugar factories, in which 31 factories ran milling activities until the end of 2024, while 2 factories were in standby status and 3 others were in suspended operations. The volume totalled at 11.98 million tons, with an average yield of 7.09%. Total sugar production reached 851.22 thousand tons, a growth compared to the previous year, driven by increased land productivity and production process efficiency.

Financially, the Company's consolidated revenue reached IDR4.98 trillion, an increase of 31.88% compared to the realization in 2023 of IDR3.78 trillion. The increase was contributed from sugar sales of IDR3.97 trillion, equivalent to 269.36 thousand tons at an average price of IDR14,722/kg, as well as molasses sales of IDR1.01 trillion, equivalent to 407,080 tons. SugarCo also recorded a net profit margin of 10.67%, far surpassing the 2024 WPB-R target of only 0.62%.

For investment, as of end of December 2024, total investment realization reached IDR373.35 billion, reflecting a 9.56% increase from the previous year. However, this achievement represents only 30.14% of the total investment plan outlined in the 2024 WPB-R, primarily due to several unrealized capital expenditures (capex), particularly from State Capital Participation (PMN) financing. The majority of the investment was directed towards the purchase of machinery and installations amounting to IDR340.62 billion, company buildings amounting to IDR8.45 billion, and assets under construction amounting to IDR13.88 billion.

Challenges and Obstacles Faced by the Company

In 2024, SGN encountered various challenges that impacted operational stability and performance, both on upstream (on-farm) and downstream (off-farm) fronts. One major external factors that put pressure on agribusiness activities was the changing climate patterns. Following significant impacts from El Niño in the previous year, extreme weather conditions continued in 2024 with indications of La Niña in the second half of the year. The phenomenon is characterized by increased rainfall in various SugarCo operational areas, potentially causing local flooding, inundation of agricultural land, as well as logistical disruptions, and distribution of raw materials.

distribusi bahan baku. Akibatnya, akses terhadap lahan dan efisiensi proses panen mengalami kendala, sehingga turut memengaruhi pasokan tebu ke pabrik.

Sebagai respon atas dinamika iklim tersebut, SugarCo mengimplementasikan sejumlah langkah mitigasi, antara lain penguatan sistem drainase kebun, penyesuaian jadwal panen, penggunaan varietas tebu yang lebih toleran terhadap kelembapan tinggi, serta pemantauan intensif terhadap prakiraan cuaca dan curah hujan. Perseroan juga memperkuat koordinasi lintas unit dan dengan instansi terkait seperti BMKG (Badan Meteorologi, Klimatologi, dan Geofisika) untuk meningkatkan akurasi perencanaan operasional di musim hujan.

Dari sisi produktivitas, volume tebu tergiling hingga akhir 2024 tercatat sebesar 11,98 juta ton atau hanya 88,51% dari target RKAP-P. Ketidaktercapaian ini dipengaruhi oleh turunnya produktivitas tebu (protas TS) serta persaingan yang semakin ketat dalam memperoleh Bahan Baku Tebu (BBT), terutama di wilayah Jateng, Jatim I, dan Jatim II yang bersinggungan langsung dengan pabrik gula swasta. Untuk menghadapi kondisi tersebut, SugarCo memperkuat loyalitas petani melalui peningkatan kelancaran pembayaran DO (*Delivery Order*), optimalisasi pasokan kebun TR (Tebu Rakyat) dan TS (Tebu Sendiri), serta intensifikasi koordinasi antarpabrik agar tidak terjadi tumpang tindih pasokan di lapangan.

Dari sisi *off-farm*, terdapat sejumlah tantangan yang memengaruhi efektivitas operasional pabrik. Beberapa kendala utama dan langkah penanganan yang telah diimplementasikan antara lain sebagai berikut:

1. Belum tercapainya kapasitas giling optimal, yang ditanggulangi dengan mengawali musim giling berdasarkan analisis potensi tebu dan melakukan penyesuaian pengaturan kapasitas giling secara lebih presisi sesuai kemampuan masing-masing pabrik.
2. Rendahnya efisiensi energi, yang diatasi melalui serangkaian langkah teknis seperti pembersihan rutin badan pemanas dengan pengecekan tingkat kebersihan *scrap*, pengaturan ulang distribusi daya listrik (*power rearrangement*), perbaikan faktor daya, optimalisasi pemanfaatan daya listrik di pabrik, serta peningkatan efisiensi operasional *boiler*.
3. Tingginya jam berhenti pabrik, yang ditangani dengan memperkuat peran Tim *Reliability Centered Maintenance* (RCM) dalam pengawasan dan perbaikan peralatan, serta mengoptimalkan dukungan dari *Nusantara Maintenance Facility* (NMF) dalam pengadaan dan fabrikasi komponen pabrik. Selain itu, pengawalan proses *maintenance* secara intensif dilakukan oleh tim *ad hoc*, khususnya selama *individual test* dan *general test*.
4. Fluktuasi kualitas Gula Kristal Putih (GKP), yang ditanggapi dengan upaya standardisasi dan optimalisasi penggunaan bahan pembantu proses, peningkatan tekanan vakum pada *boiling pan* (BP) minimal 5 cmHg, serta penyesuaian skema masak yang diselaraskan dengan kualitas bahan baku tebu.

Consequently, access to agricultural land and the efficient harvest processes were constrained, thus affecting the supply of sugarcane to the factory.

In response to the climate challenges, SugarCo implemented several mitigation measures, including strengthening the drainage system in the plantation, adjusting the harvest schedule, cultivating sugarcane varieties more adaptive to high humidity, and intensive monitoring of weather forecasts and rainfall. The Company also strengthened coordination across units and with relevant agencies such as BMKG (Meteorology, Climatology, and Geophysical Agency) to improve the accuracy of operational planning in the rainy season.

On productivity, the volume of sugarcane milled until the end of 2024 was recorded at 11.98 million tons, or only 88.51% of the WPB-R target. The underachievement was attributed by declining sugarcane productivity (protas TS), as well as increasingly fierce competition in obtaining Sugarcane Raw Materials (BBT), especially in the Central Java, East Java I, and East Java II regions, which directly intersect with private sugar factories. In response, SugarCo strengthens farmers' loyalty by improving seamless DO (Delivery Order) payments, optimizing the supply of TR (People's Cane) and TS (Own Cane) plantations, and intensifying coordination among factories to avoid overlapping supplies.

In terms of off-farm, several challenges affected the effectiveness of the factory operations. The following lists major obstacles and handling measures implemented:

1. Underachievement of optimal milling capacity, was dealt with starting the milling season based on an analysis of sugarcane potential and making adjustments to milling capacity settings more precisely according to the capabilities of each factory.
2. Poor energy efficiency, which was addressed through a series of technical measures such as routine cleaning of heating equipments by checking the cleanliness level of scrap, power rearrangement, power factor improvement, optimization of electric power utilization in the mill, and improvement of boiler operational efficiency.
3. High plant downtime, was managed by strengthening the role of the Reliability Centered Maintenance (RCM) Team in equipment supervision and repair, as well as optimizing support from Nusantara Maintenance *Facility* (NMF) in the procuring and assembling of plant components. In addition, intensive supervision of the maintenance process was carried out by an ad hoc team, especially during individual tests and general tests.
4. Inconsistent quality of White Crystal Sugar (GKP), was responded to by standardizing and optimizing the use of process auxiliaries, increasing the vacuum pressure in the boiling pan (BP) by minimum of 5 cmHg, and adjusting the cooking scheme in line with the quality of sugarcane raw materials.

Secara keseluruhan, tantangan yang dihadapi sepanjang 2024 telah dikelola melalui pendekatan strategis dan kolaboratif. Konsolidasi rutin antarunit, koordinasi dengan Holding, serta peningkatan efektivitas pengawasan menjadi elemen penting yang mendukung tercapainya sejumlah target Perseroan, meskipun terdapat deviasi pada beberapa indikator. SugarCo tetap berkomitmen untuk memperkuat daya saing dan ketahanan operasional di tengah dinamika industri yang terus bergerak.

Prospek Usaha Tahun 2025

Prospek usaha PT Sinergi Gula Nusantara pada tahun 2025 diproyeksikan tetap positif dan menjanjikan, sejalan dengan Rencana Jangka Panjang Perusahaan (RJPP) 2025–2029. SugarCo menetapkan ambisi strategis untuk menjadi produsen gula nasional terintegrasi terkemuka, dengan peran sentral dalam mewujudkan swasembada gula dan mengakselerasi kemajuan *bioenergy* di Indonesia. Ambisi tersebut dijabarkan melalui tiga pilar utama bisnis, yaitu sugar *production, bioethanol development,* dan *green business & circular economy*, serta dua pilar pendukung yaitu penguatan proses bisnis dan pengembangan sumber daya manusia.

Secara eksternal, prospek usaha SugarCo semakin diperkuat oleh tren pertumbuhan sektor pertanian nasional yang mencatat kinerja kuat, dengan kontribusi sekitar 13–14% terhadap Produk Domestik Bruto (PDB) nasional, dan pertumbuhan dua digit di awal tahun 2025. Selain itu, berdasarkan proyeksi Bank Dunia dan OECD–FAO, negara berkembang seperti Indonesia akan tetap menjadi pusat pertumbuhan permintaan gula global hingga satu dekade ke depan, seiring pertumbuhan konsumsi domestik yang solid. Meskipun harga gula dunia mengalami penurunan moderat sekitar 15% (*year-on-year*) pada awal 2025, hal ini memberikan ruang bagi SugarCo untuk mengoptimalkan efisiensi biaya produksi dan memperkuat pangsa pasar lokal. Lebih jauh, arah kebijakan nasional juga memberikan dukungan penting melalui Peraturan Presiden No. 40 Tahun 2023 yang menargetkan swasembada gula konsumsi dan industri pada 2028 dan pengembangan bioenergi berbasis *bioethanol,* membuka peluang ekspansi bisnis baru yang sejalan dengan kapabilitas Perseroan.

Di sisi hilir, prospek SugarCo diperkuat oleh rencana pembangunan pabrik bioethanol di Glenmore, Banyuwangi, yang ditargetkan beroperasi pada September 2027 melalui skema *joint venture* dengan PT Pertamina Power Indonesia. Kerja sama ini menunjukkan langkah SugarCo untuk mendiversifikasi portofolio bisnis dan memperluas kontribusi pada transisi energi bersih nasional. SugarCo juga direncanakan akan mendapatkan penugasan untuk mengakuisisi dua entitas, yaitu PT Energi Agro Nusantara (Enero) dari PTPN I dan PT Gendhis Multi Manis (GMM) dari PERUM BULOG. Kedua akuisisi ini tidak hanya akan menambah aset strategis, tetapi juga memperkuat struktur pasokan bahan baku dan kapabilitas produksi gula nasional secara keseluruhan.

Dari sisi operasional, optimalisasi areal tanam menjadi prioritas utama. SugarCo merencanakan perluasan area perkebunan melalui kerja sama operasional (KSO) dengan

Overall, the challenges faced throughout 2024 have been managed through a strategic and collaborative approach. Regular consolidation among units, coordination with the Holding, and increased effectiveness of supervision are important elements that contributed to the several Company's target accomplishment despite deviations in a number of indicators. SugarCo remains committed to strengthening our competitiveness and operational resilience amidst the ever-evolving industry dynamics.

Business Prospects for 2025

PT Sinergi Gula Nusantara's business prospects in 2025 are projected to remain positive and promising, in line with the Company's Long-Term Plan 2025-2029. SugarCo sets a strategic ambition to become a leading integrated national sugar producer, with a central role in achieving sugar self-sufficiency and accelerating the progress of bioenergy in Indonesia. The ambition is elaborated through three main business pillars, comprising of sugar production, bioethanol development, and green business & circular economy, as well as two supporting pillars, which are of strengthening business processes and developing human resources.

Externally, SugarCo's business prospects are further strengthened by the growth of the national agricultural sector, which recorded strong performance, contributing around 13-14% to the national Gross Domestic Product (GDP) and double-digit growth in early 2025. Additionally, World Bank and OECD-FAO projected that developing countries, such as Indonesia, will continue to drive global sugar demand growth for the next decade, as domestic consumption grows strong. Despite a moderate decline in global sugar prices of around 15% (year-on-year) in early 2025, SugarCo believes the circumstance will push for optimized production cost efficiency and stronger local market share. Furthermore, policy direction at the national level also provides important support through Presidential Regulation No. 40/2023, which targets self-sufficiency in sugar consumption and industry by 2028 as well as focus on development of bioethanol-based bioenergy, thus opening opportunities for new business expansion that is aligned with the Company's capabilities.

On the downstream side, SugarCo's prospects are enhanced by plans to build a bioethanol plant in Glenmore, Banyuwangi, which is targeted to start operation in September 2027 through a joint venture scheme with PT Pertamina Power Indonesia. The cooperation demonstrates SugarCo's steps to diversify our business portfolio and expand our contribution to the national clean energy transition. SugarCo is also planned to be assigned to acquire two entities, which are PT Energi Agro Nusantara (Enero) of PTPN I and PT Gendhis Multi Manis (GMM) of PERUM BULOG. Both acquisitions will add strategic assets as well as strengthen the raw material supply structure and overall national sugar production capability.

On the operational side, optimizing the plantation area is the utmost priority. SugarCo has plans to expand the plantation area through operational cooperation (KSO) with Perhutani,

Perhutani seluas lebih dari 500 ha serta pengembangan tambahan lahan hingga 14.000 ha. Strategi ini diharapkan dapat meningkatkan volume tebu digiling dan memperkuat ketahanan pasokan bahan baku dalam jangka panjang.

Dalam aspek keberlanjutan dan inovasi, SugarCo juga mendorong program ekonomi sirkular, seperti pemanfaatan blotong untuk pupuk *bioneensis* dan konversi limbah ampas tebu menjadi *biochar*, yang dirancang bekerja sama dengan mitra industri seperti RPN dan PT Aludra Solusi Indonesia.

Sementara itu, peningkatan tata kelola dan efisiensi operasional terus dilakukan melalui integrasi sistem manajemen ISO (9001, 14001, 37001, dan 27001) serta pemutakhiran SOP menjadi lebih ramping dan terintegrasi di seluruh unit kerja. Hal ini menjadi pondasi penting dalam memastikan keberlanjutan dan ketahanan bisnis Perseroan ke depan.

Dengan seluruh inisiatif dan strategi tersebut, SugarCo berada pada jalur yang kuat untuk memperkuat daya saing industri gula nasional, sekaligus berperan aktif dalam agenda transisi energi dan pembangunan ekonomi berkelanjutan di Indonesia.

covering more than 500 ha, as well as additional land development of up to 14,000 ha. The strategy is expected to increase the volume of sugarcane milled and strengthen the security of raw material supply in the long term.

In terms of sustainability and innovation, SugarCo promotes circular economy programs, by the utilizing bagasse for biofertilizer and the converting bagasse waste into biochar, designed in collaboration with industry partners such as RPN and PT Aludra Solusi Indonesia.

Meanwhile, improvement in governance and operational efficiency progresses through the integration of ISO management systems (9001, 14001, 37001, and 27001) and the streamlined and integrated SOPs update across all work units. This lays important foundation in ensuring sustainability and resilience of the Company's business going forward.

All of the initiatives and strategies will put SugarCo on a clear path to strengthen the competitiveness of the national sugar industry, while playing an active role in the energy transition agenda and sustainable economic development in Indonesia.

Riwayat Singkat PT Sinergi Gula Nusantara
PT Sinergi Gula Nusantara at a Glance

Sejarah Pendirian

PT Sinergi Gula Nusantara (SGN), yang juga dikenal sebagai SugarCo atau "Perseroan", merupakan entitas anak dari PT Perkebunan Nusantara III (Persero) yang bergerak di sektor agrobisnis dan agroindustri. Fokus utama usaha mencakup pengelolaan perkebunan tebu, industri gula pasir, perdagangan besar, dan eceran produk gula, kopi, cokelat serta produk turunannya. Selain bisnis inti tersebut, Perseroan juga memiliki ruang untuk mengembangkan kegiatan usaha lain guna mengoptimalkan pemanfaatan sumber daya yang dimiliki.

Berdasarkan surat persetujuan Menteri BUMN nomor S527/MBU/07/2021 tanggal 26 Juli 2021 tentang Persetujuan Pendirian SugarCo, SGN resmi didirikan pada 17 Agustus 2021 berdasarkan Akta Pendirian No. 08 oleh Notaris Nanda Fauz Iwan, S.H, M.Kn., dan telah memperoleh pengesahan dari Kementerian Hukum dan Hak Asasi Manusia Republik Indonesia melalui Keputusan No. AHU-0051271.AH.01.01 Tahun 2021 tanggal 19 Agustus 2021. Pembentukan SGN merupakan bagian dari 88 program prioritas Kementerian BUMN periode 2020–2023 yang ditujukan untuk mempercepat pencapaian Program Ketahanan Pangan nasional, khususnya swasembada gula.

Sebagai bagian dari langkah strategis, pada tahun 2022 Perseroan melakukan aksi korporasi berupa pemisahan tidak murni (*spin-off*) aset dan liabilitas dari delapan entitas BUMN perkebunan, yakni PT Perkebunan Nusantara II, VII, IX, X, XI, XIV, PT Buma Cima Nusantara, dan PT Industri Gula Glenmore. Aksi ini didasarkan pada persetujuan Menteri BUMN melalui Surat No. S-641/MBU/10/2022 tanggal 6 Oktober 2022 dan disahkan oleh para pemegang saham pada tanggal yang sama. Melalui aksi tersebut, SGN secara resmi mengambil alih pengelolaan 36 Pabrik Gula (PG) di seluruh Indonesia, menjadikannya sebagai pengelola terbesar industri gula nasional di lingkungan PTPN Group.

Perkembangan Perusahaan

Pada 1 Desember 2023, *Holding* Perkebunan Nusantara, PT Perkebunan Nusantara III (Persero) secara resmi mengumumkan penggabungan 13 entitas anak menjadi dua *subholding*, yaitu PalmCo dan SupportingCo, sebagai bagian dari pelaksanaan Program Strategis Nasional (PSN) dalam rangka memperkuat ketahanan pangan dan energi nasional.

Subholding PalmCo dibentuk melalui penggabungan PT Perkebunan Nusantara V, VI, dan XIII ke dalam PT Perkebunan Nusantara IV sebagai entitas penerima, serta pemisahan tidak murni sebagian aset PTPN III (Persero) ke dalam PTPN IV. Sementara itu, *Subholding* SupportingCo dibentuk melalui penggabungan PT Perkebunan Nusantara II, VII, VIII, IX, X, XI, XII, dan XIV ke dalam PT Perkebunan Nusantara I sebagai entitas penerima.

Produk dan Jasa
Products and Services

Berdasarkan aktivitas bisnis yang dijalankan, Perseroan memproduksi berbagai komoditas dan layanan yang berfokus pada industri gula. Lingkup usaha utama mencakup produksi Gula Kristal Putih (GKP), tetes, serta berbagai produk turunan lainnya. Seluruh produk tersebut dihasilkan dari 36 Pabrik Gula (PG) yang berada di bawah pengelolaan PT Sinergi Gula Nusantara, yang tersebar di berbagai wilayah strategis guna mendukung efisiensi operasional dan pemenuhan kebutuhan pasar nasional.

Based on its business activities, the Company produces various commodities and services focused on the sugar industry. Its main business scope includes the production of White Crystal Sugar (GKP), molasses, and various other derivative products. These products are entirely produced by 36 Sugar Factories (*Pabrik Gula*, PG) under the management of PT Sinergi Gula Nusantara, spread across various strategic regions to support operational efficiency and meet national market demand.

Gula Kristal Putih (GKP)
White Crystal Sugar

Gula Kristal Putih merupakan produk utama SugarCo yang dihasilkan melalui proses pengolahan tebu di Pabrik Gula. Produk ini digunakan secara luas untuk kebutuhan konsumsi rumah tangga maupun sebagai bahan baku industri makanan dan minuman. GKP yang diproduksi oleh SugarCo memenuhi standar mutu nasional, baik dari sisi warna, kemurnian, maupun tingkat kehalusan kristal, sehingga mampu bersaing di pasar domestik maupun sebagai substitusi impor.

White Crystal Sugar is SugarCo's main product, produced through sugarcane processing at the factory. The product is widely used for household consumption and as a raw material for the food and beverage industry. GKP produced by SugarCo meets national quality standards in terms of color, purity, and crystal fineness, enabling it to compete in the domestic market and as a substitute for imports.

Tetes
Molasses

Tetes adalah hasil samping dari proses kristalisasi gula yang tetap memiliki nilai ekonomi tinggi. Produk ini dimanfaatkan sebagai bahan baku industri bioenergi, pakan ternak, dan produk fermentasi seperti etanol dan monosodium glutamat (MSG). SugarCo secara konsisten menjaga kualitas tetes yang dihasilkan agar sesuai dengan kebutuhan industri hilir, sekaligus berkontribusi terhadap diversifikasi pemanfaatan hasil perkebunan tebu.

Molasses is a by-product of the sugar crystallization process that retains high economic value. This product is utilized as a raw material for the bioenergy industry, animal feed, and fermentation products such as ethanol and monosodium glutamate (MSG). SugarCo consistently maintains the quality of the molasses produced to meet the demand of downstream industries, while also contributing to the diversification of sugarcane plantation product utilization.

Produk Turunan
Derivative Products

Selain GKP dan tetes, SugarCo juga mengembangkan produk-produk turunan tebu lainnya, seperti ampas tebu (*bagasse*) yang digunakan sebagai bahan bakar alternatif pembangkit uap di pabrik (*boiler fuel*) maupun potensi bahan baku biomaterial. Di masa mendatang, pengembangan produk turunan diarahkan untuk mendukung prinsip circular economy serta peningkatan nilai tambah melalui diversifikasi produk berbasis tebu yang ramah lingkungan dan bernilai komersial tinggi.

In addition to GKP and molasses, SugarCo also develops other derivative products, such as bagasse, which is used as an alternative boiler fuel in factories and as a potential raw material for biomaterials. In the future, the development of derivative products will be directed towards the principles of a circular economy and increasing added value through the diversification of environmentally friendly and high commercial value sugarcane-based products.

Sepanjang tahun 2024, dinamika perekonomian global masih berada pada fase pemulihan yang disertai tantangan struktural. *World Economic Outlook* yang diterbitkan IMF mencatat proyeksi pertumbuhan ekonomi dunia sebesar 3,2%, mencerminkan stabilisasi pasca tekanan resesi pada negara maju. Tekanan inflasi juga berangsur mereda, dari 6,8% pada 2023 menjadi sekitar 5,9% pada 2024, seiring dengan konsistensi kebijakan moneter ketat yang diambil di berbagai negara. Meskipun demikian, ketidakpastian global tetap tinggi, dipengaruhi oleh gejolak geopolitik, perlambatan perdagangan lintas negara, dan fragmentasi rantai pasok. Situasi ini menuntut dunia usaha untuk lebih adaptif dan resilien dalam menjaga kesinambungan operasional.

Bagi Indonesia, kondisi eksternal tersebut menjadi katalis untuk memperkuat ketahanan ekonomi domestik, melalui strategi diversifikasi pasar, penguatan industri berbasis sumber daya lokal, serta peningkatan efisiensi dalam tata kelola usaha.

Meskipun dihadapkan pada dinamika global yang penuh ketidakpastian, Pemerintah Indonesia konsisten menjaga stabilitas makroekonomi melalui harmonisasi kebijakan fiskal dan moneter yang terukur. Fokus utama diarahkan pada pembangunan infrastruktur yang berkelanjutan, peningkatan kualitas sumber daya manusia, serta percepatan transformasi digital di berbagai sektor ekonomi. Dengan fondasi ekonomi yang semakin kokoh, Indonesia optimistis dapat mempertahankan laju pertumbuhan positif, sekaligus membuka ruang bagi terciptanya peluang baru yang mampu memperkuat daya saing nasional di tengah tantangan global.

Dalam konteks inilah, PT Sinergi Gula Nusantara menegaskan perannya untuk tetap tumbuh dan berdaya saing, dengan mengedepankan efisiensi operasional dan strategi keberlanjutan guna menghadapi dinamika global yang penuh tantangan.

Analisis Perekonomian Indonesia

Sepanjang tahun 2024, perekonomian Indonesia tetap menunjukkan ketahanan yang solid di tengah ketidakpastian global. Produk Domestik Bruto (PDB) tumbuh sebesar 5,03% (*c-to-c*), relatif stabil dibandingkan tahun sebelumnya dan mencerminkan daya tahan ekonomi domestik terhadap perlambatan ekonomi dunia. Pertumbuhan kuartal IV-2024 tercatat 5,02% (*y-on-y*) dengan laju 0,53% (*q-to-q*), ditopang oleh konsumsi rumah tangga yang konsisten, peningkatan investasi, serta ekspansi belanja pemerintah pada sektor prioritas.

Global Economic Analysis

Throughout 2024, the global economy demonstrated signs of recovery amidst structural challenges. The World Economic Outlook published by the IMF projected global economic growth of 3.2%, reflecting post-recession stabilization on developed countries. Inflationary pressures also gradually eased, from 6.8% in 2023 to estimated 5.9% in 2024, as the consistently tight monetary policies were adopted in various countries. However, global uncertainty remains high, influenced by geopolitical turmoil, a slowdown in cross-border trade, and supply chain fragmentation. The situation requires the business world to be more adaptive and resilient in maintaining operational continuity.

For Indonesia, these external conditions have become a catalyst for strengthening domestic economic resilience through market diversification strategies, strengthening local resource-based industries, and improving business management efficiency.

Despite facing high degree of uncertainty in global dynamics, the Indonesian government has consistently maintained macroeconomic stability through the harmonization of measured fiscal and monetary policies. The primary focus is on sustainable infrastructure development, improving the quality of human resources, and accelerating digital transformation in various economic sectors. With an increasingly solid economic foundation, Indonesia is optimistic that it can maintain positive growth, while opening up opportunities to strengthen national competitiveness amid global challenges.

In this context, PT Sinergi Gula Nusantara emphasizes its position by continuously growing and remaining competitive, by prioritizing operational efficiency and strategies on sustainability in order to face challenging global dynamics.

Indonesian Economic Analysis

Throughout 2024, Indonesia's economy continued to show solid resilience amid global uncertainty. Gross Domestic Product (GDP) grew by 5.03% (c-to-c), relatively stable compared to the previous year and reflecting the domestic economy's resilience to the global economic slowdown. Growth in the fourth quarter of 2024 was recorded at 5.02% (y-on-y) with a rate of 0.53% (q-to-q), supported by consistent household consumption, increased investment, and expansion of government spending in priority sectors.

Dari sisi produksi, sektor Transportasi dan Pergudangan mencatat kinerja tertinggi dengan pertumbuhan mencapai 13,96%, sejalan dengan mobilitas masyarakat dan peningkatan aktivitas logistik nasional. Sementara itu, dari sisi pengeluaran, Komponen Pembentukan Modal Tetap Bruto (PMTB) atau investasi tumbuh sebesar 4,61%, menjadi yang tercepat dalam enam tahun terakhir, didorong percepatan pembangunan infrastruktur dan peningkatan realisasi proyek strategis nasional.

Selain itu, inflasi domestik terkendali di kisaran 2,8%–3,0%, jauh lebih rendah dari rata-rata global, menunjukkan efektivitas sinergi kebijakan moneter dan fiskal. Stabilitas nilai tukar Rupiah, dukungan cadangan devisa, serta kondisi perbankan yang sehat memberikan ruang lebih besar bagi dunia usaha untuk berinvestasi dan berinovasi.

Kinerja ini memperlihatkan keberhasilan pemerintah dalam menjaga momentum pertumbuhan melalui tiga strategi utama: penguatan konsumsi domestik sebagai penopang utama PDB, hilirisasi industri berbasis sumber daya alam, serta percepatan transformasi digital ekonomi nasional. Dengan fondasi makroekonomi yang semakin kokoh, Indonesia optimistis dapat mempertahankan laju pertumbuhan berkelanjutan sekaligus menciptakan peluang investasi baru di tengah tantangan global yang masih berlanjut.

From the production side, the Transportation and Warehousing sector recorded the highest performance with growth reaching 13.96%, in line with community mobility and increased national logistics activities. Meanwhile, from the expenditure side, the Gross Fixed Capital Formation (GFCF) component or investment grew by 4.61%, the fastest in the last six years, driven by accelerated infrastructure development and increased realization of national strategic projects.

In addition, domestic inflation is stabilized at approximately 2.8%–3.0%, significantly lower than the global average, demonstrating the effectiveness of monetary and fiscal policy synergies. The stability of the IDR exchange rate, foreign exchange reserves, and healthy banking conditions provided greater scope for the business world to invest and innovate.

The performance demonstrates the government's success in maintaining growth momentum through three key strategies: strengthening domestic consumption as the main driver of GDP, downstreaming natural resource-based industries, and accelerating the digital transformation of the national economy. With an increasingly solid macroeconomic foundation, Indonesia is optimistic that it can maintain a sustainable growth rate while creating new investment opportunities amid ongoing global challenges.

Kondisi Industri Gula Indonesia

Industri gula nasional masih memegang peranan penting dalam mendukung ketahanan pangan dan stabilitas ekonomi Indonesia. Sepanjang tahun 2024, kebutuhan gula dalam negeri tercatat terus meningkat seiring dengan pertumbuhan populasi, perkembangan industri makanan dan minuman, serta tingginya konsumsi rumah tangga. Permintaan gula nasional diperkirakan mencapai lebih dari 6,7 juta ton, yang terdiri atas kebutuhan gula konsumsi rumah tangga (GKP) sekitar 3,4 juta ton dan kebutuhan gula industri lebih dari 3,3 juta ton.

Di sisi pasokan, produksi gula dalam negeri belum sepenuhnya mampu memenuhi kebutuhan nasional. Produksi gula konsumsi (GKP) tahun 2024 diperkirakan mencapai kisaran 2,6–2,7 juta ton, meningkat dibandingkan tahun sebelumnya berkat perbaikan produktivitas tebu dan peningkatan efisiensi pabrik gula. Namun, masih terdapat defisit pasokan yang dipenuhi melalui mekanisme impor, terutama untuk kebutuhan industri makanan dan minuman.

Tren harga gula juga dipengaruhi dinamika global, termasuk pergerakan harga gula internasional yang pada 2024 mengalami fluktuasi akibat faktor cuaca ekstrem di negara produsen utama, kenaikan biaya energi, serta kebijakan perdagangan global. Pemerintah Indonesia melalui Kementerian Perdagangan tetap berupaya menjaga stabilitas harga di tingkat konsumen, antara lain melalui penetapan Harga Eceran Tertinggi (HET) untuk GKP serta pengaturan tata niaga impor gula industri.

Dalam konteks tersebut, PT Sinergi Gula Nusantara, sebagai produsen gula terbesar di Indonesia, memiliki peran strategis dalam memperkuat kapasitas produksi dalam negeri. Melalui peningkatan produktivitas tebu, modernisasi pabrik gula, serta perluasan kemitraan dengan petani, Perseroan berkomitmen mendukung agenda pemerintah untuk mengurangi ketergantungan impor dan memperkuat ketahanan pangan nasional.

Kontribusi SugarCo terhadap Industri Gula Nasional

Sebagai produsen gula terbesar di Indonesia, PT Sinergi Gula Nusantara (SugarCo) memegang peran strategis dalam menjaga ketersediaan gula konsumsi nasional sekaligus mendukung agenda pemerintah dalam mewujudkan kemandirian dan ketahanan pangan. Pada tahun 2024, SugarCo mengelola lebih dari 30 unit pabrik gula yang tersebar di sentra produksi utama dengan kapasitas giling tebu mencapai 11,97 juta ton. Dari jumlah tersebut, Perseroan menghasilkan 851 ribu ton gula kristal putih (GKP), yang memberikan kontribusi signifikan terhadap produksi gula nasional.

Indonesian Sugar Industry Situation

The national sugar industry still plays an important role in supporting Indonesia's food security and economic stability. Throughout 2024, domestic sugar demand is projected to increase in line with population growth, the growth of the food and beverage industry, and high household consumption. National sugar demand is estimated to reach over 6.7 million tons, consisting of approximately 3.4 million tons for household consumption (White Crystal Sugar, GKP) and over 3.3 million tons for industrial use.

On the supply side, domestic sugar production has not been able to fully meet national demand. The production of consumption sugar (GKP) in 2024 was estimated to reach approximately 2.6–2.7 million tons, an increase from the previous year as a result of improvements in sugarcane productivity and increased efficiency in sugar factories. However, there was still a supply deficit that was fulfilled through imports, especially for the food and beverage industry.

Sugar price trends are also influenced by global dynamics, including international sugar price movements, which fluctuated due to extreme weather conditions in major producing countries, rising energy costs, and global trade policies in 2024. The Ministry of Trade of the Indonesian government persistently strive to maintain price stability at the consumer level, including by establishing Maximum Retail Price (HET) for consumption sugar and the regulation of industrial sugar imports.

In the described context, PT Sinergi Gula Nusantara, as the largest sugar producer in Indonesia, has a strategic role in strengthening domestic production capacity. By increasing sugarcane productivity, modernizing sugar factories, and expanding partnerships with farmers, the Company is committed to supporting the government's agenda to reduce import dependency and strengthen national food security.

SugarCo's Contribution to National Sugar Industry

As the largest sugar producer in Indonesia, PT Sinergi Gula Nusantara (SugarCo) plays a strategic role in maintaining the sugar supply for national consumption while fulfilling the government's mandate to achieving food self-sufficiency and security. In 2024, SugarCo managed more than 30 sugar factories spread across major production centers with a sugarcane milling capacity of 11.97 million tons. From that amount, the Company produced 851 thousand tons of white crystal sugar (GKP), which contributed significantly to national sugar production.

Dengan pangsa pasar terbesar di industri gula nasional, SugarCo tidak hanya berperan sebagai pemasok utama kebutuhan rumah tangga, tetapi juga sebagai mitra strategis dalam pengembangan ekosistem pertanian tebu bersama petani rakyat. Melalui program kemitraan, modernisasi pabrik, serta peningkatan produktivitas , SugarCo mampu meningkatkan rendemen tebu dan efisiensi produksi, sekaligus memperkuat daya saing industri gula nasional.

Kontribusi ini menjadikan SugarCo sebagai tulang punggung industri gula Indonesia, yang tidak hanya berorientasi pada pemenuhan kebutuhan domestik, tetapi juga mendukung terciptanya stabilitas harga, keberlanjutan pasokan, serta pertumbuhan ekonomi di wilayah-wilayah sentra perkebunan tebu.

Having the largest sugar market share domestically, SugarCo takes role as the key supplier for household demands, as well as the strategic partner in the sugarcane plantation development with smallholder farmers. Through partnership programs, factory modernization, and increased on-farm productivity, SugarCo has been able to increase sugarcane yields and production efficiency, while strengthening the competitiveness of the national sugar industry.

The contribution makes SugarCo the backbone of Indonesia's sugar industry, which is not only oriented towards meeting domestic needs, but also supports price stability, supply sustainability, and economic growth in sugarcane plantation areas.

Tinjauan Operasi Per Segmen Usaha
Operational Review by Business Segment

PT Sinergi Gula Nusantara merupakan anak perusahaan dari PT Perkebunan Nusantara III (Persero) sekaligus *sub-holding* yang berfokus pada pengelolaan dan pengembangan industri gula nasional. Perseroan memiliki mandat strategis untuk memperkuat ketahanan pangan Indonesia melalui peningkatan produktivitas tebu, optimalisasi kinerja pabrik gula, serta perluasan akses distribusi gula kristal putih bagi masyarakat.

Segmen usaha Perseroan secara umum terbagi dalam dua kategori utama. Pertama, produksi gula kristal putih (GKP) yang menjadi lini bisnis inti. Sepanjang tahun 2024, Perseroan berhasil menggiling 11,97 juta ton tebu dan menghasilkan 851 ribu ton GKP, sehingga menempatkan SGN sebagai kontributor terbesar terhadap produksi gula nasional.

Usaha pendukung yang berkaitan dengan industri gula, antara lain pengelolaan hasil samping berupa tetes (*molasses*) dan ampas tebu (*bagasse*). Tetes dimanfaatkan sebagai bahan baku industri bioenergi, pakan ternak, serta alkohol industri, sedangkan *bagasse* digunakan sebagai sumber energi biomassa untuk mendukung operasional pabrik. Upaya ini tidak hanya memberikan diversifikasi pendapatan, tetapi juga sejalan dengan inisiatif keberlanjutan dan efisiensi energi Perseroan.

Melalui kedua segmen usaha ini, PT Sinergi Gula Nusantara berkomitmen untuk memperkuat daya saing industri gula nasional sekaligus menciptakan nilai tambah yang berkelanjutan bagi pemegang saham, petani mitra, dan pemangku kepentingan lainnya.

Produktivitas Segmen Usaha

Sepanjang tahun 2024, 31 pabrik gula telah melaksanakan giling dengan 2 pabrik gula dalam kondisi *standby* dan 3 pabrik gula dalam kondisi beku operasi. Perseroan mencatat kinerja operasional yang meningkat dibandingkan tahun sebelumnya, meskipun belum sepenuhnya mencapai target RKAP-P. Luas area tebu yang digarap mencapai 183.650 hektar atau 99,13% dari RKAP-P, dan lebih tinggi 2,43% dibandingkan realisasi tahun 2023 seluas 179.294 hektar.

Produktivitas tebu menunjukkan perbaikan signifikan, dari 58,27 ton per hektar pada 2023 menjadi 65,21 ton per hektar pada 2024, atau meningkat 11,90%. Pencapaian ini mencerminkan efektivitas program intensifikasi lahan dan penerapan teknologi budidaya.

Volume tebu tergiling mencapai 11,98 juta ton, naik 14,62% dibandingkan 2023, meskipun baru terealisasi 88,51% dari RKAP-P 2024. Sementara itu, rendemen 2024 rata-rata sebesar 7,09% sedikit lebih rendah dibandingkan 2023 sebesar 7,19%, sehingga baru memenuhi 98,34% dari target RKAP-P 2024.

PT Sinergi Gula Nusantara is a subsidiary of PT Perkebunan Nusantara III (Persero) as well as a sub-holding company that focuses on the management and development of the national sugar industry. The Company has been granted a strategic mandate to strengthen Indonesia's food security by increasing sugarcane productivity, optimizing sugar factory performance, and expanding access to white crystal sugar distribution for the public.

The Company's business segments are broadly divided into two main categories. First, the production of white crystal sugar (GKP), which is its core business line. Throughout 2024, the Company successfully milled 11.97 million tons of sugarcane and produced 851 thousand tons of GKP, making SGN the largest contributor to national sugar production.

Supporting businesses related to the sugar industry include the management of by-products such as molasses and bagasse. Molasses is used as a raw material for the bioenergy industry, animal feed, and industrial alcohol, while bagasse is used as a source of biomass energy to support factory operations. These efforts not only provide income diversification, but are also in line with the Company's sustainability and energy efficiency initiatives.

Through these two business segments, PT Sinergi Gula Nusantara is committed to strengthen the competitiveness of the national sugar industry while creating sustainable added value for shareholders, partner farmers, and other stakeholders.

Right-of-use assets decreased by 6.61% to IDR1.72 billion from IDR1.85 billion in the previous year. The decrease resulted from amortization on applicable lease contracts, in line with accounting provisions related to right-of-use assets.

Investasi Ventura Bersama
Pada 2024, Perseroan mencatat investasi ventura bersama sebesar Rp213,59 miliar, yang sebelumnya belum ada pada 2023. Pencatatan ini menunjukkan langkah strategis SGN dalam memperluas kolaborasi bisnis melalui skema kemitraan jangka panjang, seperti penandatanganan *framework agreement* dengan Pertamina NRE dalam penyediaan lahan untuk pabrik bioetanol. Hal tersebut dilakukan guna memperkuat kapasitas produksi dan diversifikasi usaha.

Investment in Joint Venture
In 2024, the Company recorded investments in joint venture of IDR213.59 billion, which were not recorded in 2023. The record demonstrates SGN's strategic move to expand business collaboration through long-term partnership schemes, such as the signing of a framework agreement with Pertamina NRE for the provision of land for a bioethanol plant. It was carried out to strengthen production capacity and business diversification.

Aset Tidak Lancar Lainnya
Akun aset tidak lancar lainnya naik signifikan 128,78% menjadi Rp938 juta dari Rp410 juta pada 2023. Kenaikan ini terutama berasal dari penambahan akun-akun pendukung yang bersifat jangka panjang, mencerminkan adanya pengakuan dan penyesuaian atas aset yang sebelumnya belum tercatat.

Other Non-Current Assets
Other non-current assets rose significantly by 128.78% to IDR938 million, from IDR410 million in 2023. The increase mainly arose from the addition of long-term supporting accounts, reflecting the recognition and adjustment of previously unrecorded assets.

Liabilitas

Total liabilitas meningkat 3,42% menjadi Rp6,77 triliun. Lonjakan ini terutama berasal dari kenaikan kewajiban jangka pendek untuk mendukung kebutuhan modal kerja pada periode giling 2024, termasuk pendanaan persediaan bahan baku dan biaya operasional pabrik.

Liabilities

Total liabilities increased by 3.42% to IDR6.77 trillion. The surge was mainly due to an increase in short-term liabilities to support working capital requirements for the 2024 milling period, including financing for raw material supplies and factory operating costs.

Liabilitas Jangka Pendek

Liabilitas jangka pendek melonjak 302,44% menjadi Rp6,15 triliun. Kenaikan ini mencerminkan peningkatan kewajiban yang bersifat musiman, khususnya pada periode giling di mana kebutuhan dana operasional meningkat signifikan. Hal ini juga terkait dengan penyesuaian struktur pembiayaan jangka pendek untuk menjaga kelancaran arus kas.

Current Liabilities

Current liabilities jumped 302.44% to IDR6.15 trillion. The increase reflects a rise in seasonal liabilities, particularly during the milling season when operational funding requirements increase significantly. It is also related to adjustments in the short-term financing structure to maintain smooth cash flow.

Utang Usaha
Utang usaha meningkat 50,24% dari Rp647,25 miliar pada 2023 menjadi Rp972,43 miliar pada 2024. Peningkatan ini sejalan dengan naiknya aktivitas operasional dan pembelian bahan baku serta jasa pendukung produksi pada periode giling 2024, yang menyebabkan kewajiban kepada pemasok meningkat.

Utang Lain-Lain
Utang lain-lain turun signifikan 48,04% menjadi Rp230,87 miliar dibandingkan Rp444,34 miliar pada 2023. Penurunan ini mencerminkan penyelesaian kewajiban non-operasional, seperti pembayaran kewajiban kepada pihak ketiga di luar pemasok utama, sehingga beban kewajiban non-rutin berkurang.

Liabilitas Kontrak
Liabilitas kontrak turun 45,40% menjadi Rp64,14 miliar dari Rp117,47 miliar pada tahun sebelumnya. Penurunan ini mengindikasikan berkurangnya pendapatan diterima dimuka atau kontrak yang belum terpenuhi, karena Perseroan telah melaksanakan sebagian besar kewajiban (*clearing* bertahap) kontraktual terkait penjualan produk.

Akrual
Akun akrual meningkat tajam 151,43% menjadi Rp303,37 miliar dari Rp120,66 miliar pada 2023. Lonjakan ini menunjukkan bertambahnya pencatatan biaya yang masih harus dibayar, terutama biaya operasional musim giling dan kewajiban terkait distribusi, yang dibayarkan setelah periode pelaporan.

Utang Pajak – Pajak Penghasilan Badan
Pada 2024 tercatat Rp113,95 miliar, sementara pada 2023 tidak ada saldo pada akun ini. Hal ini menunjukkan kewajiban pajak penghasilan badan yang muncul seiring dengan perolehan laba tahun berjalan 2024, sesuai dengan ketentuan perpajakan.

Utang Pajak – Pajak Lainnya
Utang pajak lainnya turun 80,18% menjadi Rp1,45 miliar dari Rp7,30 miliar pada 2023. Penurunan ini menunjukkan penyelesaian kewajiban perpajakan lain di luar PPh Badan, seperti PPN atau pajak daerah, sehingga saldo liabilitas lebih kecil di akhir periode.

Trade Payables
Trade payables increased by 50.24% from IDR647.25 billion in 2023 to IDR972.43 billion in 2024. The increase is in line with the rising operational activities and purchases of raw materials and production support services during the 2024 milling period, which caused liabilities to suppliers to increase.

Other Payables
Other payables decreased significantly by 48.04% to IDR230.87 billion compared to IDR444.34 billion in 2023. The decrease reflects the settlement of non-operating liabilities, such as payments to third parties outside of major suppliers, thereby reducing non-recurring liabilities.

Contract Liabilities
Contract liabilities decreased by 45.40% to IDR64.14 billion, from IDR117.47 billion in the previous year. The decrease indicates a reduction in advance income or unfulfilled contracts, as the Company has fulfilled most of its contractual obligations (gradual clearing) related to product sales.

Accruals
Accruals increased sharply by 151.43% to IDR303.37 billion from IDR120.66 billion in 2023. The surge indicates an increase in the recording of expenses that are still payable, particularly operating expenses during milling season and distribution-related obligations, which are paid after the reporting period.

Tax Payable – Corporate Income Tax
In 2024, corporate income tax was recorded at IDR113.95 billion, while in 2023 there was none in the account. It indicates corporate income tax payable arose in line with the income of the year in 2024, in accordance with tax regulations.

Tax Payables – Other Taxes
Other tax payables decreased by 80.18% to IDR1.45 billion from IDR7.30 billion in 2023. The decrease indicates the settlement of other tax obligations outside of corporate income tax, such as VAT or local taxes, resulting in a smaller liability balance at the end of the period.

Liabilitas Sewa
Tidak terdapat saldo liabilitas sewa pada 2024 maupun 2023. Hal ini menunjukkan bahwa tidak ada perjanjian sewa baru yang signifikan atau seluruh liabilitas sewa telah diselesaikan sebelumnya.

Pinjaman dari Pihak Berelasi
Pinjaman dari pihak berelasi sebesar Rp72,50 miliar pada 2023 telah dilunasi sepenuhnya pada 2024. Penyelesaian ini memperlihatkan strategi Perseroan untuk mengurangi ketergantungan pada pinjaman pihak berelasi dan memperkuat independensi struktur pembiayaan.

Pinjaman Bank
Pinjaman bank meningkat tajam dari Rp103,42 miliar pada 2023 menjadi Rp4,44 triliun pada 2024, atau naik 4.191,54%. Lonjakan ini mencerminkan strategi pendanaan Perseroan melalui fasilitas perbankan untuk mendukung kebutuhan modal kerja yang tinggi selama periode giling serta pembiayaan operasional pabrik gula.

Liabilitas Imbalan Kerja
Pinjaman bank tercatat sebesar Rp4,44 triliun pada tahun 2024, meningkat signifikan dibandingkan Rp103,42 miliar pada tahun 2023. Kenaikan ini bukan disebabkan oleh penambahan fasilitas pinjaman baru, melainkan akibat reklasifikasi utang jangka panjang yang telah jatuh tempo ke pos liabilitas jangka pendek. Perpindahan ini mencerminkan penyesuaian akuntansi atas jadwal pembayaran kewajiban yang akan diselesaikan dalam periode berjalan, sehingga tidak berdampak langsung terhadap peningkatan beban keuangan baru. Langkah ini juga menunjukkan komitmen Perseroan dalam menjaga transparansi pelaporan keuangan serta memastikan pengelolaan kewajiban tetap terukur dan terkendali.

Liabilitas Jangka Panjang

Liabilitas jangka panjang SGN pada tahun 2024 tercatat sebesar Rp629,16 miliar, turun tajam 87,48% dari Rp5,02 triliun pada 2023. There is no lease liability balance in 2024 or 2023. It indicates that there are no significant new lease agreements or that all lease liabilities have been settled prior.

Loans From Related Parties
Loans from related parties amounted to IDR72.50 billion in 2023 were fully repaid in 2024. The settlement demonstrates the Company's strategy to reduce its dependence on loans from related parties and strengthen the independence of its financing structure.

Bank Loans
Bank loans increased sharply from IDR103.42 billion in 2023 to IDR4.44 trillion in 2024, or an increase of 4,191.54%. The surge reflects the Company's funding strategy through banking facilities to support high working capital requirements during the milling period and sugar factory operational financing.

Employee Benefit Liabilities
Bank loans were recorded at IDR4.44 trillion in 2024, a significant increase compared to IDR103.42 billion in 2023. This increase was not driven by new loan facilities, but rather by the reclassification of long-term debt that had matured into current liabilities. This adjustment reflects an accounting treatment aligning with the repayment schedule of obligations due within the current period, and therefore does not directly result in additional financial burdens. This measure also reaffirms the Company's commitment to maintaining transparency in financial reporting and ensuring that liability management remains prudent and well-controlled.

Non-Current Liabilities

SGN's long-term liabilities in 2024 were recorded at IDR629.16 billion, a significant decrease of 87.48% from IDR5.02 trillion in 2023. This decline reflects the Company's success in restructuring long-term obligations and partially settling its loans, thereby strengthening its capital structure and enhancing long-term financial efficiency.

Pinjaman Bank
Pada 2023, pinjaman bank jangka panjang tercatat sebesar Rp4,44 triliun, namun pada 2024 tidak lagi terdapat saldo pada akun ini. Penurunan 100% ini menunjukkan bahwa pinjaman bank jangka panjang telah dilunasi atau direklasifikasi menjadi pinjaman jangka pendek. Hal ini sejalan dengan strategi restrukturisasi kewajiban keuangan SGN yang lebih menekankan pada pembiayaan jangka pendek untuk mendukung kebutuhan modal kerja pada musim giling.

Bank Loan
In 2023, long-term bank loan was recorded at IDR4.44 trillion, but in 2024 there was no balance in the account. The 100% decrease indicates that long-term bank loans have been repaid or reclassified as short-term loans. It is in line with SGN's financial restructuring strategy, which places greater emphasis on short-term financing to support working capital requirement during the milling season.

Pinjaman dari Pihak Berelasi
Tidak terdapat saldo pada akun ini baik pada 2023 maupun 2024. Hal ini menandakan bahwa SGN tidak mengandalkan pembiayaan jangka panjang dari entitas berelasi, sehingga memperkuat independensi struktur pendanaan.

Liabilitas Imbalan Kerja
Liabilitas imbalan kerja pada 2024 tercatat sebesar Rp448,36 miliar, menurun 3,58% dari Rp464,99 miliar pada 2023. Penurunan ini terutama berasal dari realisasi pembayaran manfaat pascakerja kepada karyawan yang pensiun serta hasil penyesuaian aktuaria, meskipun kewajiban ini tetap signifikan sejalan dengan jumlah tenaga kerja yang besar.

Employee Benefit Liabilities
Employee benefit liabilities in 2024 are recorded at IDR448.36 billion, down 3.58% from IDR464.99 billion in 2023. The decrease is mainly due to the realization of post-employment benefit payments to retired employees and actuarial adjustments, although the obligation remains significant in line with the considerable-sized workforce.

Liabilitas Pajak Tangguhan
Liabilitas pajak tangguhan meningkat 50,43% menjadi Rp180,80 miliar dari Rp120,19 miliar pada 2023. Kenaikan ini disebabkan oleh perbedaan temporer antara pengakuan akuntansi dan perpajakan, terutama dari depresiasi aset tetap serta pengakuan cadangan imbalan kerja, yang menghasilkan kewajiban pajak tangguhan lebih tinggi pada tahun berjalan.

Deferred Tax Liabilities
Deferred tax liabilities increased by 50.43% to IDR180.80 billion from IDR120.19 billion in 2023. The increase was due to temporary differences between accounting and tax recognition, particularly from depreciation of fixed assets and recognition of employee benefit reserves, which resulted in higher deferred tax liabilities in the current year.

Ekuitas

Ekuitas meningkat 11,25% menjadi Rp6,05 triliun, sejalan dengan laba bersih tahun berjalan yang ditahan untuk memperkuat permodalan. Hal ini menunjukkan komitmen SGN dalam memperkuat fundamental keuangan sekaligus mendukung kapasitas ekspansi di masa mendatang.

Penjualan

Penjualan gula mencapai Rp3,97 triliun, naik 34,08% dari Rp2,96 triliun pada 2023. Peningkatan ini didorong oleh kenaikan volume produksi gula kristal putih (GKP) yang lebih tinggi pada musim giling 2024, serta harga jual rata-rata yang lebih baik akibat dinamika pasar domestik. Produk gula tetap menjadi kontributor utama penjualan dengan porsi lebih dari 79% terhadap total pendapatan.

Sementara itu, penjualan tetes tercatat sebesar Rp1,01 triliun, tumbuh 23,94% dibandingkan Rp818,72 miliar pada tahun sebelumnya. Pertumbuhan ini sejalan dengan meningkatnya produksi tetes dari 505.317 ton pada 2023 menjadi 597.282 ton pada 2024, yang dimanfaatkan baik untuk pasar industri dalam negeri maupun ekspor.

Secara keseluruhan, total penjualan Perseroan tahun 2024 mencapai Rp4,98 triliun, meningkat 31,88% dibandingkan Rp3,78 triliun pada 2023. Pencapaian ini mencerminkan efektivitas strategi pemasaran, peningkatan kapasitas produksi, serta keberhasilan Perseroan dalam memperkuat posisinya sebagai pemain utama industri gula nasional.

Sales

Sugar sales reached IDR3.97 trillion, up 34.08% from IDR2.96 trillion in 2023. The increase was driven by higher production volumes of white crystal sugar (GKP) in the 2024 milling season, as well as better average selling prices due to domestic market dynamics. Sugar products remained the key contributor to sales, accounting for more than 79% of total revenue.

Meanwhile, sales of molasses were recorded at IDR1.01 trillion, grew 23.94% compared to IDR818.72 billion in the previous year. The growth is in line with the increase in molasses production from 505,317 tons in 2023 to 597,282 tons in 2024, which was utilized for both domestic industrial market and exports.

Overall, the Company's total sales in 2024 reached IDR4.98 trillion, an increase of 31.88% compared to IDR3.78 trillion in 2023. The achievement reflects the effectiveness of the marketing strategy, increased production capacity, and the Company's success in strengthening its position as a major player in the national sugar industry.

Beban Pokok Penjualan

Pada tahun 2024, jumlah beban pokok penjualan Perseroan tercatat sebesar Rp3,07 triliun, meningkat 3,77% dibandingkan Rp2,95 triliun pada 2023. Peningkatan ini terutama dipicu oleh naiknya biaya penggunaan bahan baku sebesar 146,77% menjadi Rp627,72 miliar, sejalan dengan peningkatan volume tebu digiling yang mencapai 11,98 juta ton dari 10,45 juta ton pada tahun sebelumnya. Selain itu, gaji dan kesejahteraan karyawan naik 7,80% menjadi Rp958,64 miliar karena adanya penyesuaian upah serta kebutuhan tenaga kerja tambahan pada periode giling. Beban *overhead* juga meningkat 10,50% menjadi Rp292,25 miliar, sedangkan biaya transportasi dan kemasan naik masing-masing 26,18% dan 13,72% akibat meningkatnya distribusi produk ke pasar.

Di sisi lain, terdapat beberapa pos yang mengalami penurunan. Beban pengolahan turun 20,63% menjadi Rp547,36 miliar, mencerminkan keberhasilan efisiensi energi, perbaikan proses produksi, serta penerapan *E-Task Force* di sejumlah pabrik gula. Beban penyusutan juga menurun 6,73% menjadi Rp454,84 miliar karena sebagian aset tetap mendekati akhir masa manfaat ekonomisnya. Sementara itu, biaya lain-lain menurun 43,42% menjadi

Cost of Goods Sold

In 2024, the Company's cost of goods sold was recorded at IDR3.07 trillion, an increase of 3.77% compared to IDR2.95 trillion in 2023. The increase was mainly driven by a 146.77% rise in raw material costs to IDR627.72 billion, in line with an increase in sugarcane milling volume to 11.98 million tons from 10.45 million tons in the previous year. In addition, employee salaries and welfare increased by 7.80% to IDR958.64 billion due to wage adjustments and additional labor requirements during the milling period. Overhead expenses also increased by 10.50% to IDR292.25 billion, while transportation and packaging costs rose by 26.18% and 13.72%, respectively, due to increased product distribution to the market.

On the other hand, several accounts experienced decline. Processing expenses fell 20.63% to IDR547.36 billion, reflecting the success of energy efficiency, production process improvements, and the E-Task Force implementation in several factories. Depreciation expenses also decreased by 6.73% to IDR454.84 billion as several fixed assets were nearing the end of their depreciable economic lives. Meanwhile, other expenses

Rp1,14 miliar akibat berkurangnya biaya insidental yang tidak berulang pada tahun berjalan.

Penyesuaian dari sisi persediaan juga berkontribusi terhadap perubahan beban pokok penjualan. Persediaan awal tahun naik 15,11% menjadi Rp478,40 miliar, sedangkan pembelian turun 11,61% menjadi Rp326,97 miliar karena optimalisasi stok. Di sisi lain, persediaan akhir tahun naik signifikan 44,94% menjadi Rp693,40 miliar, sejalan dengan hasil produksi yang lebih tinggi. Dengan kombinasi faktor-faktor tersebut, kenaikan beban pokok penjualan relatif lebih rendah dibandingkan pertumbuhan penjualan, sehingga margin kotor meningkat dan memberikan dampak positif terhadap profitabilitas Perseroan.

decreased by 43.42% to IDR1.14 billion due to a reduction in non-recurring incidental expenses during the year.

Adjustments on the inventory side also contributed to changes in cost of goods sold. Inventory in the beginning of the year rose 15.11% to IDR478.40 billion, while purchases fell 11.61% to IDR326.97 billion due to inventory optimization. On the other hand, Inventory in the end of the year rose significantly by 44.94% to IDR693.40 billion, in line with higher production results. With a combination of these factors, the increase in cost of goods sold was relatively lower than sales growth, thereby increasing gross margin and lending a positive impact on the Company's profitability.

Laba Bruto

Laba bruto meningkat tajam 133,03% menjadi Rp1,91 triliun dari Rp821,30 miliar pada 2023. Kenaikan ini merupakan hasil kombinasi antara pertumbuhan penjualan dan efisiensi produksi, sehingga margin kotor naik signifikan. Pencapaian ini mencerminkan kemampuan Perseroan dalam mengubah momentum kenaikan produksi menjadi profitabilitas yang nyata.

Gross Profit

Gross profit increased sharply by 133.03% to IDR1.91 trillion from IDR821.30 billion in 2023. The increase was the result of a combination of sales growth and production efficiency, which led to a significant increase in gross margin. The achievement reflects the ability of the Company to convert the momentum of increased production into real profitability.

Beban Penjualan

Beban penjualan naik 65,02% menjadi Rp7,99 miliar. Peningkatan ini berhubungan dengan meningkatnya biaya distribusi, logistik, serta promosi seiring dengan pertumbuhan penjualan. Namun, kontribusinya terhadap total pendapatan masih relatif kecil, sehingga tidak berdampak signifikan terhadap kinerja keuangan secara keseluruhan.

Beban Umum dan Administrasi

Beban umum dan administrasi Perseroan pada tahun 2024 tercatat sebesar Rp655,04 miliar, naik 116,16% dibandingkan Rp303,04 miliar pada 2023. Peningkatan signifikan ini terutama dipengaruhi oleh kenaikan pos gaji, upah, dan tunjangan lainnya yang hampir dua kali lipat menjadi Rp492,47 miliar dari Rp248,57 miliar, sejalan dengan penyesuaian struktur remunerasi pasca konsolidasi pabrik gula serta bertambahnya kebutuhan tenaga kerja pendukung. Selain itu, jasa profesional melonjak menjadi Rp84,74 miliar dari Rp4,74 miliar pada tahun sebelumnya, mencerminkan adanya kebutuhan konsultasi, audit, dan layanan pendukung lainnya dalam memperkuat tata kelola perusahaan.

Komponen lain yang turut meningkat adalah donasi yang naik signifikan menjadi Rp16,45 miliar, serta akomodasi yang mencapai Rp15,00 miliar, sejalan dengan intensitas kegiatan operasional dan program kemitraan. Pendidikan dan pelatihan juga naik hampir tiga kali lipat menjadi Rp14,68 miliar, menunjukkan komitmen Perseroan terhadap pengembangan kompetensi SDM. Di sisi lain, biaya pemeliharaan meningkat menjadi Rp9,19 miliar dari Rp4,05 miliar, sejalan dengan kebutuhan perawatan sarana dan fasilitas produksi.

Meski beberapa pos meningkat tajam, terdapat pula pengendalian biaya di beberapa area, seperti penyusutan yang turun 61,65% menjadi Rp10,71 miliar serta penyisihan penurunan nilai yang tidak lagi dibebankan pada 2024. Dengan demikian, meskipun beban umum dan administrasi mengalami lonjakan, peningkatan ini masih dalam koridor wajar untuk mendukung ekspansi operasional. Dampaknya juga tidak menggerus profitabilitas Perseroan karena tertutupi oleh kenaikan laba bruto yang signifikan.

Selling Expenses

Selling expenses increased by 65.02% to IDR7.99 billion. The increase was related to higher distribution, logistics, and promotion costs in line with sales growth. However, the expense account remains relatively small, and therefore does not have a significant impact on overall financial performance.

General and Administrative Expenses

The Company's general and administrative expenses in 2024 were recorded at IDR655.04 billion, an 116.16% increase compared to IDR303.04 billion in 2023. The significant increase was largely driven by the nearly twofold increase in salaries, wages, and other allowances amounted to IDR492.47 billion, from IDR248.57 billion, in line with adjustments to the remuneration structure after the sugar factories were consolidated and more supporting personnels were required. In addition, professional services surged from IDR4.74 billion in the previous year to IDR84.74 billion, reflecting the need for consulting, auditing, and other support services to strengthen corporate governance.

Other components that also increased were donations, which rose significantly to IDR16.45 billion, and accommodation, which reached IDR15.00 billion, in line with the intensity of operational activities and partnership programs. Education and training also increased nearly threefold to IDR14.68 billion, demonstrating the Company's commitment to developing employees' competencies. In contrast, maintenance costs increased from IDR4.05 billion to IDR9.19 billion, for required maintenance of production facilities and equipment.

Although several accounts increased sharply, there were also cost controls in several areas, such as depreciation, which fell by 61.65% to IDR10.71 billion, and the absence of provision on impairment in 2024. Although general and administrative expenses increased, it is still within a reasonable range to support operational expansion. The impact did not weaken the Company's profitability as it was offset by a significant increase in gross profit.

It provides a more transparent picture of the economic value of sugarcane plants in the growth process and improves the quality of financial reports.

Bagian Atas Rugi Bersih Entitas Ventura Bersama

Kerugian sebesar Rp37,30 miliar yang tercatat dari entitas ventura bersama pada tahun 2024 mencerminkan fase awal dari investasi kemitraan yang tengah dijalankan. Meskipun saat ini memberikan kontribusi negatif terhadap laporan keuangan, pencapaian tersebut justru menandai langkah strategis SGN dalam memperluas portofolio bisnis melalui kolaborasi jangka panjang. Investasi ini diproyeksikan memberikan nilai tambah yang berkelanjutan di masa mendatang seiring dengan peningkatan kapasitas, stabilisasi operasional, dan pematangan model bisnis.

Share of Net Loss of Joint Venture

The loss of IDR37.30 billion recorded from joint venture entities in 2024 reflects the early phase of the partnership investment currently underway. Although it currently contributes negatively to the financial statements, the realization marks a strategic step by SGN in expanding its business portfolio through long-term collaboration. The investment is projected to provide sustainable added value in the future as capacity increases, operations stabilize, and the business model matures.

Penghasilan Keuangan

Beban Keuangan

Beban keuangan naik 5,28% menjadi Rp484,60 miliar. Kenaikan ini terkait dengan peningkatan pinjaman bank jangka pendek yang digunakan untuk memenuhi kebutuhan modal kerja pada musim giling. Meskipun meningkat, rasio beban keuangan terhadap pendapatan menurun, mencerminkan bahwa pertumbuhan pendapatan jauh lebih besar dibandingkan pertumbuhan beban bunga.

Finance Cost

Finance costs rose 5.28% to IDR484.60 billion. The increase was related to an increase in short-term bank loans used to fulfil working capital requirements during the milling season. Despite the increase, the ratio of finance costs to revenue declined, concluding that revenue growth was significantly greater than interest expense growth.

Lain-Lain – Bersih

Pos lain-lain pada tahun 2024 mencatat rugi sebesar Rp55,27 miliar, berbalik dari keuntungan Rp24,11 miliar pada 2023. Meskipun demikian, pencatatan ini terutama disebabkan oleh adanya beban non-operasional yang bersifat insidental dan tidak berulang, seperti penyusutan tertentu maupun provisi yang timbul pada tahun berjalan. Dengan kata lain, kinerja utama operasional Perseroan tetap solid karena pos ini tidak berkaitan langsung dengan aktivitas inti produksi dan penjualan. Justru, penyelesaian beban insidental ini memberikan fondasi yang lebih sehat dan bersih bagi laporan keuangan di tahun-tahun mendatang, sehingga SugarCo dapat lebih fokus pada pertumbuhan berkelanjutan dan penguatan profitabilitas operasional.

Others – Net

The account of others recorded a loss of IDR55.27 billion in 2024, reversing the gain of IDR24.11 billion in 2023. However, it was mainly attributable to incidental and non-recurring non-operating expenses, such as certain depreciation and provisions arising in the year. In other words, the Company's fundamental operating performance remained solid as these accounts were not directly related to core production and sales activities. In fact, the settlement of these incidental expenses provides a healthier and cleaner foundation for financial statements in the coming years, allowing SugarCo to focus more on sustainable growth and strengthening operational profitability.

Laba Sebelum Pajak Penghasilan

Laba sebelum pajak naik signifikan 750,66% menjadi Rp707,58 miliar, dibandingkan Rp83,18 miliar pada 2023. Lonjakan ini merupakan refleksi keberhasilan kombinasi peningkatan pendapatan, efisiensi biaya produksi, serta pencatatan keuntungan dari aset biologis.

Profit Before Income Tax

Profit before tax rose significantly by 750.66% to IDR707.58 billion, compared to IDR83.18 billion in 2023. The surge reflects the successful combination of increased revenue, production cost efficiency, and the recording of profits from biological assets.

Beban Pajak Penghasilan

Beban pajak pada tahun 2024 tercatat sebesar Rp176,37 miliar, meningkat 189,87% dibandingkan Rp60,84 miliar pada 2023. Kenaikan ini sejalan dengan lonjakan laba sebelum pajak yang berhasil dibukukan Perseroan. Peningkatan beban pajak tersebut mencerminkan konsekuensi positif dari kinerja operasional yang semakin solid dan profitabilitas yang lebih tinggi. Dengan kata lain, bertambahnya kewajiban pajak menunjukkan bahwa Perseroan tidak hanya mampu menciptakan nilai bagi pemegang saham, tetapi juga memberikan kontribusi yang lebih besar kepada negara melalui penerimaan pajak.

Income Tax Expenses

The tax expenses in 2024 is recorded at IDR176.37 billion, an increase of 189.87% compared to IDR60.84 billion in 2023. The increase is in line with the surge in pre-tax profit recorded by the Company. The increase in tax expenses reflects the positive consequences of increasingly solid operational performance and higher profitability. In other words, the increase in tax liabilities shows that the Company is not only capable of creating value for shareholders, but also making a greater contribution to the state through tax revenue.

Laba Tahun Berjalan

Laba tahun berjalan pada 2024 melonjak 2.278,27% menjadi Rp531,21 miliar dari Rp22,34 miliar pada 2023. Pencapaian ini mencerminkan keberhasilan strategi operasional dan efisiensi biaya, sekaligus menegaskan efektivitas transformasi pasca konsolidasi yang berhasil dikonversi menjadi profitabilitas nyata.

Profit for The Year

Profit for the year ending 2024 jumped 2,278.27% to IDR531.21 billion from IDR22.34 billion in 2023. The achievement reflects the success of operational strategies and cost efficiency, while confirming the effectiveness of the post-consolidation transformation that has been successfully converted into real profitability.

Penghasilan Komprehensif Lain

Komponen penghasilan komprehensif lain menunjukkan dinamika berbeda. Surplus revaluasi aset tetap menurun 88,91% menjadi Rp82,52 miliar dari Rp743,94 miliar pada 2023 karena revaluasi besar telah dilakukan pada tahun sebelumnya. Pos pengukuran kembali liabilitas imbalan kerja berubah menjadi rugi Rp2,37 miliar akibat penyesuaian aktuaria, berbalik dari keuntungan Rp8,61 miliar pada 2023. Sementara itu, pajak penghasilan terkait mencatat keuntungan Rp521 juta, berbalik dari rugi Rp1,90 miliar pada tahun sebelumnya.

Other Comprehensive Income

Other comprehensive income components show different dynamics. The fixed asset revaluation surplus decreased by 88.91% to IDR82.52 billion, from IDR743.94 billion in 2023 due to a large revaluation that had been carried out in the previous year. The remeasurement of employee benefit liabilities turned into a loss of IDR2.37 billion due to actuarial adjustments, reversing the gain of IDR8.61 billion in 2023. Meanwhile, related income tax recorded gain of IDR521 million, reversing from a loss of IDR1.90 billion in the previous year.

Jumlah Laba Komprehensif Tahun Berjalan

Total laba komprehensif tahun berjalan tercatat Rp611,88 miliar, turun 20,84% dari Rp772,99 miliar pada 2023. Penurunan ini sepenuhnya dipengaruhi oleh lebih kecilnya surplus revaluasi aset tetap, meskipun laba bersih meningkat signifikan. Dengan demikian, kinerja 2024 lebih mencerminkan profitabilitas riil dari kegiatan usaha inti dibandingkan 2023 yang lebih banyak dipengaruhi oleh faktor akuntansi revaluasi aset.

Total Comprehensive Income for The Year

Total comprehensive income for the year was recorded at IDR611.88 billion, down 20.84% from IDR772.99 billion in 2023. The decline was entirely due to a smaller surplus from the revaluation of fixed assets, despite a significant increase in net profit. Thus, the 2024 performance better reflects the real profitability of core business activities compared to 2023, which was more influenced by the accounting factor of asset revaluation.

Rasio Solvabilitas
Rasio solvabilitas berfungsi untuk menilai kapasitas Perseroan dalam memenuhi kewajiban jangka panjang maupun keseluruhan utangnya. Pengukuran ini mencakup *Debt to Total Assets Ratio* (rasio utang terhadap aset) dan *Debt to Total Equity Ratio* (rasio utang terhadap ekuitas).

Solvency

The Company's ability to meet its debt obligations can be measured through indicators of solvency and liquidity ratios, with the following explanations:

Solvency Ratio
The solvency ratio serves to assess the Company's capacity to meet its long-term obligations and overall debt. The measurement includes the Debt to Total Assets Ratio and the Debt to Total Equity Ratio.

Tabel Solvabilitas | Solvency

Kategori Akun *Account Catagories*	2024	2023	Kenaikan (Penurunan) *Increase (Decrease)*
Rasio Liabilitas Terhadap Ekuitas Debt to Equity Ratio	73,34	83,49	(10,15)
Rasio Liabilitas Terhadap Asset Debt to Asset Ratio	34,60	37,88	(3,27)

Pada tahun 2024, *Debt to Equity Ratio* (DER) Perseroan tercatat sebesar 73,34%, turun 10,15 poin dari posisi 83,49% pada 2023. Penurunan ini menegaskan adanya penguatan ekuitas seiring dengan peningkatan laba bersih, sehingga ketergantungan Perseroan terhadap pembiayaan berbasis utang semakin berkurang. Di sisi lain, *Debt to Asset Ratio* (DAR) juga menunjukkan tren perbaikan dengan penurunan 3,27 poin dari 37,88% pada 2023 menjadi 34,60% pada 2024. Hal ini mencerminkan semakin kecilnya porsi aset yang dibiayai oleh liabilitas.

In 2024, the Company's Debt to Equity Ratio (DER) was recorded at 73.34%, down 10.15 points from 83.49% in 2023. The decline confirms the strengthening of equity in line with an increase in net profit, thereby reducing the Company's dependence on debt-based financing. On the other hand, the Debt to Asset Ratio (DAR) also showed an improving trend, decreasing by 3.27 points from 37.88% in 2023 to 34.60% in 2024. It reflects the decreasing portion of assets financed by liabilities.

Secara keseluruhan, penurunan signifikan pada kedua rasio tersebut mencerminkan struktur permodalan yang lebih sehat, risiko keuangan yang semakin terkendali, serta memperkuat daya tahan Perseroan dalam mendukung pertumbuhan usaha berkelanjutan di masa mendatang.

Overall, the significant decline in both ratios reflects a healthier capital structure, better controlled financial risks, and strengthens the Company's resilience in supporting sustainable business growth in the future.

Rasio Likuiditas

Rasio likuiditas digunakan untuk menilai kemampuan Perseroan dalam memenuhi kewajiban jangka pendeknya dengan memanfaatkan aset lancar yang tersedia. Pengukuran ini meliputi *Current Ratio* (rasio lancar) dan *Cash Ratio* (rasio kas), yang secara bersama-sama memberikan gambaran mengenai tingkat fleksibilitas keuangan Perseroan dalam menjaga likuiditas dan stabilitas arus kas operasional.

Liquidity Ratio

Liquidity ratios are employed to assess the Company's ability to meet its short-term obligations by utilizing available current assets. These measurements include the Current Ratio and Cash Ratio, which together provide an overview of the Company's financial flexibility in maintaining liquidity and operational cash flow stability.

Tabel Likuiditas | Liquidity

Kategori Akun *Account Catagories*	2024	2023	Kenaikan (Penurunan) *Increase (Decrease)*
Rasio Kas Cash Ratio	3,64	7,74	(4,10)
Rasio Lancar Current Ratio	20,93	64,27	(43,33)

Pada tahun 2024, *Cash Ratio* Perseroan tercatat sebesar 3,64%, turun 4,10 poin dari posisi 7,74% pada 2023. Penurunan ini dipengaruhi oleh penggunaan kas yang lebih besar untuk mendukung kebutuhan operasional, investasi, serta pembayaran kewajiban jangka pendek. Meski menurun, rasio ini tetap mencerminkan kemampuan Perseroan dalam menjaga ketersediaan kas untuk memenuhi liabilitas lancar secara langsung.

In 2024, the Company's Cash Ratio was recorded at 3.64%, down 4.10 points from 7.74% in 2023. The decline was influenced by greater cash usage to support operational needs, investments, and short-term liability payments. Despite the decline, the ratio still reflects the Company's ability to maintain cash availability to directly fulfill current liabilities.

Di sisi lain, *Current Ratio* Perseroan juga menurun signifikan dari 64,27% pada 2023 menjadi 20,93% pada 2024, atau turun 43,33 poin. Penurunan ini utamanya disebabkan oleh peningkatan liabilitas jangka pendek, namun angka yang masih tinggi ini tetap menunjukkan bahwa aset lancar Perseroan jauh melebihi kewajiban lancarnya.

On the other hand, the Company's Current Ratio also decreased significantly from 64.27% in 2023 to 20.93% in 2024, or a decline of 43.33 points. The decline was mainly attributable to increased short-term liabilities, but the relatively high figure shows that the Company's current assets far exceed its current liabilities.

Secara keseluruhan, meskipun terjadi koreksi pada kedua rasio likuiditas, posisinya masih menunjukkan kondisi keuangan yang kuat dan likuiditas yang terjaga. Hal ini menegaskan kapasitas Perseroan dalam memenuhi kewajiban jangka pendek sekaligus menjaga stabilitas operasional.

Overall, despite the correction in both liquidity ratios, the Company's position still indicates strong financial health and maintained liquidity. It confirms the Company's capacity to meet its short-term obligations while maintaining operational stability.

Kolektibilitas Piutang

Kolektibilitas piutang Perseroan dievaluasi melalui rasio perputaran piutang, yang mengukur efektivitas Perseroan dalam menagih piutang usaha dalam periode tertentu. Rasio ini menjadi indikator utama untuk menilai kemampuan Perseroan mengonversi piutang menjadi kas secara cepat, yang pada gilirannya berdampak langsung pada tingkat likuiditas operasional.

Selain itu, rasio perputaran secara umum digunakan untuk menilai tingkat efisiensi dan efektivitas pengelolaan aset. Rasio ini menunjukkan sejauh mana sumber daya yang dimiliki Perseroan dioptimalkan untuk mendukung kegiatan operasional dan menghasilkan pendapatan. Tingkat perputaran yang lebih tinggi menandakan pengelolaan aset yang lebih produktif, sekaligus memperkuat daya saing Perseroan dalam industri.

Receivables Collectibility

The Company's receivables collectability is evaluated through the receivables turnover ratio, which measures the Company's effectiveness in collecting trade receivables within a certain period. The ratio is a key indicator for assessing the Company's ability to quickly convert receivables into cash, which in turn has a direct impact on the level of operational liquidity.

In addition, the turnover ratio is generally used to assess the level of efficiency and effectiveness of asset management. The ratio shows the extent to which the Company's resources are optimized to support operational activities and generate revenue. A higher turnover rate indicates more productive asset management, while strengthening the Company's competitiveness in the industry.

Tabel Kolektabilitas Piutang | Receivable Collectability

Kategori Akun *Account Catagories*	2024	2023	Kenaikan (Penurunan) *Increase (Decrease)*
Collection Period	3,28	2,62	0,66
Inventory Turnover	4,03	5,14	(1,11)
Receivable Turnover	111	139	(28)

Periode penagihan (*collection period*) tahun 2024 tercatat sebesar 3,28%, meningkat dibandingkan 2,62% pada tahun 2023. Kenaikan ini menunjukkan adanya perbaikan dalam efisiensi proses penagihan piutang, di mana waktu yang dibutuhkan untuk mengonversi piutang menjadi kas semakin singkat. Namun demikian, perputaran persediaan (*inventory turnover*) menurun dari 5,14% menjadi 4,03%, yang mengindikasikan peningkatan tingkat persediaan atau waktu penyimpanan yang lebih lama, sejalan dengan strategi pengamanan stok guna menjaga ketersediaan produk menghadapi dinamika pasar.

Sementara itu, perputaran piutang (*receivable turnover*) turun dari 139% pada 2023 menjadi 111% pada 2024. Penurunan ini disebabkan oleh meningkatnya volume transaksi kredit serta saldo piutang yang lebih besar sepanjang tahun, meskipun efisiensi penagihan tetap terjaga. Secara keseluruhan, rasio aktivitas tahun 2024 mencerminkan pengelolaan aset lancar yang masih efisien dan mendukung kelancaran arus kas operasional perusahaan.

The collection period in 2024 was recorded at 3.28%, an improvement compared to 2.62% in 2023. This increase indicates enhanced efficiency in the receivables collection process, as the time required to convert receivables into cash has become shorter. However, the inventory turnover decreased from 5.14% to 4.03%, indicating higher inventory levels or longer storage periods, in line with the Company's strategy to secure product availability amid market dynamics.

Meanwhile, the receivable turnover declined from 139% in 2023 to 111% in 2024. This decrease was due to the higher volume of credit transactions and larger receivable balances throughout the year, although collection efficiency remained well maintained. Overall, the activity ratios in 2024 reflect efficient management of current assets that continue to support the smooth operation of the Company's cash flow.

Rasio Keuangan Lainnya

Di samping kemampuan Perseroan dalam memenuhi kewajiban dan efektivitas dalam penagihan piutang, terdapat pula rasio-rasio keuangan penting lainnya yang perlu diperhatikan sebagai berikut:

Informasi Kelangsungan Usaha
Going Concern Information

Hal-hal yang Berpotensi Berpengaruh Signifikan Terhadap Kelangsungan Usaha Perusahaan

Laporan keuangan Perseroan telah disusun berdasarkan prinsip kelangsungan usaha. Kondisi Perseroan pada 31 Desember 2024 adalah sebagai berikut:

Pada tanggal 31 Desember 2024, liabilitas jangka pendek melebihi aset lancar Perseroan sebesar Rp4.858.683. Hal ini terutama disebabkan oleh pinjaman bank sebesar Rp4.438.226 yang akan jatuh tempo pada tanggal 23 Desember 2025. Kondisi ini menimbulkan keraguan atas kelangsungan usaha Perseroan.

Assessment Manajemen atas Hal-hal yang Berpotensi Berpengaruh Signifikan Terhadap Kelangsungan

Untuk menghadapi kondisi tersebut, manajemen Perseroan menyusun dan telah melaksanakan rencana strategis sebagai berikut:

i. **Perpanjangan jatuh tempo pinjaman bank atau *reprofiling* pinjaman bank**
Untuk mengatasi pinjaman bank yang akan jatuh tempo pada tanggal 23 Desember 2025, Perseroan sedang dalam proses untuk meminta perpanjangan pinjaman bank hingga Desember 2028 dan disaat yang bersamaan sedang mengajukan *reprofiling* pinjaman. Untuk proses perpanjangan pinjaman bank, Perseroan telah memperoleh persetujuan dari 4 bank anggota sindikasi dan sedang dalam proses untuk mendapatkan persetujuan dari 4 anggota sindikasi lainnya sehingga perpanjangan dapat disetujui. Untuk *reprofiling* pinjaman, Perseroan telah mendapatkan kesepakatan dari kreditur untuk tenor *reprofiling* pinjaman hingga tahun 2032 dan menambah jumlah fasilitas kredit, sementara persyaratan-persyaratan lain masih sedang dalam proses negosiasi.

Matters Potentially Having Significant Impact on the Company's Business Continuity

The Company's financial statements have been prepared based on the going concern basis. The Company's conditions as of 31 December 2024 were as follows:

As of 31 December 2024, the Company's current liabilities exceeds its current assets by IDR4,858,683. This is mainly attributable to the bank loan amounting to IDR4,438,226 which will be due on 23 December 2025. This condition raises doubts about the Company's ability to continue as a going concern.

The Management's Assessment of Matters Potentially Having Significant Impact on the Company's Business Continuity

To deal with this condition, the Company prepared and has been implementing the following strategic plans:

i. **The extension of the bank loan maturity or the reprofiling of the bank loan**
To address the bank loan that is due on 23 December 2025, the Company is in the process of requesting an extension of the bank loan until December 2028 and simultaneously applying for loan reprofiling. For the bank loan extension process, the Company has obtained approval from 4 syndicated banks and is in the process of securing approval from the other 4 syndicated members before the extension can be approved. For the loan reprofiling, the Company has reached an agreement with the bank regarding the tenor of the loan reprofiling until 2032 and is increasing the amount of credit facilities, while other terms are still under negotiation process.

ii. Kewajiban keuangan lainnya dan kebutuhan operasional

Untuk memenuhi kewajiban keuangan lainnya dan operasional Perusahaan ke depannya, Perseroan juga telah menginisiasi beberapa rencana jangka panjang sebagai berikut:

1. Ekspansi area *on-farm*.
2. Peningkatan kapasitas.
3. Pembangunan pabrik gula baru.
4. Reaktivasi pabrik gula yang tidak aktif.
5. Pengembangan lahan kemitraan petani.

Rencana-rencana strategis di atas telah disetujui oleh Direksi Perseroan. Lebih lanjut, Perseroan pada tanggal 7 Juli 2025 telah memperoleh surat dukungan keuangan dari PTPN III, pemegang saham mayoritas, yang menyampaikan bahwa:

a. PTPN III tidak memiliki rencana untuk divestasi kepemilikan dari Perseroan, membubarkan atau melakukan likuidasi;
b. PTPN III akan memberikan dukungan kepada Perseroan baik dalam pelaksanaan transformasi keuangan dan program operasional secara keseluruhan untuk menjaga keberlangsungan jangka panjang;
c. PTPN III akan memberikan dukungan finansial untuk membiayai dan mendanai setiap kekurangan kas sehubungan dengan kegiatan usaha, kebutuhan operasional dan belanja modal, serta pemenuhan kewajiban pembayaran pinjaman sindikasi Perseroan.

Manajemen berkeyakinan bahwa Perseroan akan mampu memenuhi kewajiban keuangannya pada saat jatuh tempo, sehingga Perseroan akan tetap dapat melangsungkan kegiatan usahanya. Namun demikian, laporan keuangan mengindikasikan adanya ketidakpastian material yang dapat menimbulkan keraguan signifikan terhadap kemampuan Perseroan untuk mempertahankan kelangsungan usahanya. Laporan keuangan disusun atas dasar kelangsungan usaha dan tidak termasuk penyesuaian yang mungkin timbul dari hasil ketidakpastian.

Asumsi kelangsungan usaha Perseroan memiliki risiko dan ketidakpastian; sehingga ada kemungkinan bahwa perubahan situasi akan mengubah proyeksi ini, yang selanjutnya dapat mempengaruhi kelangsungan usaha Perseroan.

Usaha Perusahaan di Tahun 2023 serta Asumsi yang Digunakan Manajemen Dalam Melakukan *Assessment*

Beberapa faktor yang menjadi pertimbangan manajemen dalam melakukan asesmen terhadap kelangsungan usaha adalah sebagai berikut:

1. Kinerja Keuangan;
2. Likuiditas;
3. Solvabilitas;
4. Masalah Internal;
5. Perkara Hukum.

ii. Other financial obligations and operational needs

1. Expansion of on-farm areas.
2. Capacity enhancement.
3. Construction of a new sugar factory.
4. Reactivation of inactive sugar factories.
5. Development of farmer partnership land.

The above strategic plans have been approved by the Company's Board of Directors. Furthermore, on 7 July 2025, the Company received letters of financial support from PTPN III, its majority shareholder, stating the following commitments:

a. PTPN III has no plans or intentions to divest its ownership in the Company, dissolve the Company, or initiate liquidation;
b. PTPN III will continue to support the Company in implementing financial transformation and operational excellence programs to ensure its long-term sustainability;
c. PTPN III will provide financial support to cover any cash shortfalls related to the Company's business activities, operational needs, capital expenditures, and obligations under the Company's syndicated loan agreements.

Management believes that the Company will be able to meet its financial obligations when they fall due, so the Company will continue as a going concern. Nevertheless, the financial statements indicate that a material uncertainty exists that may cast significant doubt about the Company's ability to continue as a going concern. The financial statements have been prepared on the going concern basis and do not include any adjustments that might result from the outcome of the uncertainties.

The Company's going concern assumptions are subject to risk and uncertainty; hence there is a possibility that changes in circumstances will alter these projections, which may have an impact on the Company's going concern.

The Company's Operations in 2023 and Assumptions Used by Management in Assessment

Several factors considered by management in assessing business continuity are as follows:

1. Financial Performance;
2. Liquidity;
3. Solvency;
4. Internal Issues;

Hal ini mencerminkan komitmen Perseroan dalam memberikan penghargaan yang layak sekaligus memastikan kesejahteraan karyawan.

Selain remunerasi, Perseroan juga menyediakan berbagai fasilitas dan tunjangan yang disesuaikan dengan jenjang jabatan, antara lain BPJS Kesehatan dan Ketenagakerjaan, Tunjangan Hari Raya Keagamaan (THRK), asuransi kesehatan, tunjangan cuti tahunan, serta program pensiun. Karyawan juga berhak mengajukan cuti tahunan sesuai kebutuhan dengan persetujuan atasan, serta cuti khusus sebagaimana diatur dalam Peraturan Perusahaan Tahun 2023–2025 Pasal 30, yang mencakup cuti melahirkan, cuti perkawinan, izin bagi karyawan pria saat istri melahirkan, dan cuti untuk kepentingan penting lainnya.

In 2024, the remuneration for permanent employees in the lowest positions exceeded 100% of the Jakarta Provincial Minimum Wage (UMP) set by the Jakarta Provincial Government at IDR5,067,381. It reflects the Company's commitment to providing appropriate rewards while ensuring employee welfare.

In addition to remuneration, the Company also provides various facilities and benefits tailored to job levels, including BPJS Health and Employment, Religious Holiday Allowance (THRK), health insurance, annual leave allowance, and pension programs. Employees are also entitled to apply for annual leave as needed with the approval of their supervisors, as well as special leave as stipulated in Article 30 of the 2023–2025 Company Regulations, which includes maternity leave, marriage leave, paternity leave for wives in labor, and leave for other important reasons.

Kebijakan ini sejalan dengan tata nilai AKHLAK dan bertujuan meningkatkan produktivitas karyawan dalam mendukung pencapaian target serta visi Perseroan sebagai pelaku utama industri gula nasional. Untuk memastikan pemahaman yang merata, sosialisasi dan komunikasi mengenai kebijakan *Zero Harassment* dilaksanakan secara rutin melalui berbagai saluran, baik media digital maupun cetak, serta disampaikan dalam setiap kegiatan dan pertemuan resmi Perseroan.

Hubungan Industrial

Mekanisme Penyelesaian Permasalahan Hubungan Industrial

Mekanisme penyelesaian permasalahan hubungan industrial di SGN dirancang untuk memastikan setiap isu antara Perseroan dan pekerja dapat ditangani secara adil, efektif, dan sesuai dengan ketentuan peraturan ketenagakerjaan yang berlaku. Proses penyelesaian diawali dengan identifikasi awal oleh tim *Human Capital* (HC) bersama pihak terkait, yang menganalisis akar masalah berdasarkan data serta dokumen pendukung, termasuk Peraturan Perusahaan dan kontrak kerja.

Apabila ditemukan permasalahan, penyelesaian dilakukan melalui dialog bipartit antara Perseroan dan karyawan guna mencapai kesepakatan secara musyawarah. Jika dialog bipartit belum menghasilkan solusi, permasalahan dilanjutkan ke tahap mediasi yang difasilitasi oleh Dinas Ketenagakerjaan, di mana mediator memberikan anjuran sesuai ketentuan hukum yang berlaku. Apabila mediasi tetap tidak mencapai kesepakatan, kasus dapat diteruskan ke arbitrase atau Pengadilan Hubungan Industrial (PHI), dengan tim Legal dan HC bertindak sebagai perwakilan Perseroan.

Setelah tercapai keputusan, baik melalui kesepakatan bersama maupun putusan PHI, implementasi dilakukan secara transparan sesuai ketentuan yang berlaku. Selain penyelesaian reaktif, Perseroan juga mengedepankan langkah preventif, antara lain melalui sosialisasi regulasi ketenagakerjaan, pelatihan hubungan industrial, serta komunikasi yang proaktif untuk meminimalkan potensi permasalahan di masa depan. Dengan mekanisme yang komprehensif ini, SGN berupaya menjaga keharmonisan hubungan industrial, menciptakan lingkungan kerja yang kondusif, sekaligus memastikan stabilitas operasional dan produktivitas Perseroan tetap terjaga.

Zero Harassment Policy

SGN is committed to creating a safe, comfortable, and work environment that is free from discrimination, violence, and harassment by implementing a Zero Harassment policy. The policy is in line with AKHLAK's values and aims to increase employee productivity in supporting the achievement of the Company's targets and vision as a major producer in the national sugar industry. To ensure uniform understanding, socialization and communication regarding the Zero Harassment policy are carried out regularly through various channels, both digital and print media, and are conveyed in every official activity and meeting of the Company.

Industrial Relations

Mechanism for Resolving Industrial Relations Issues

The mechanism for resolving industrial relations issues at SGN is designed to ensure that every issue that arises between the Company and the workforce can be handled fairly, effectively, and in accordance with applicable labor regulations. The resolution process begins with an initial identification by the Human Capital (HC) team and the relevant parties, by analysing the root cause of the issue based on data and supporting documents, including Company Regulations and employment contracts.

When the issue is identified, it will be resolved through bipartite dialogue between the Company and employees to reach a mutual agreement through deliberation. If bipartite dialogue does not produce a solution, the issue will be raised to the mediation phase facilitated by the Manpower Office, where the mediator will provide recommendations in accordance with applicable laws. If mediation still fails to reach an agreement, the case may be referred to arbitration or the Industrial Relations Court (PHI), whereby the Legal and HC teams acting as representatives of the Company.

When a decision has been reached, either through mutual agreement or a PHI ruling, implementation is carried out transparently in accordance with applicable regulations. In addition to reactive resolution, the Company also prioritizes preventive measures, including through the dissemination of labor regulations, industrial relations training, and proactive communication to minimize potential problems in the future. With the comprehensive mechanism in place, SGN strives to maintain harmonious industrial relations, create a conducive working environment, and ensure the Company's operational stability and productivity are maintained.

Evaluasi dilaksanakan bersama *Risk Owner* untuk memastikan efektivitas mitigasi yang telah direncanakan.

Apabila hasil evaluasi menunjukkan bahwa mitigasi belum optimal dalam menurunkan tingkat risiko, *Risk Owner* berkewajiban mengambil langkah lanjutan untuk memperkuat pengendalian. Should the evaluation results show that mitigation has not been optimal in reducing the risk level, the Risk Owner is obliged to take further steps to strengthen control. Conversely, if mitigation successfully reduced the risk to an acceptable level, no additional action is required, however monitoring procedures shall be continuously implemented to ensure that the risk level does not increase in the future.

At the strategic level, the Board of Directors, through the Risk Management Committee, actively assesses the effectiveness of the overall risk management system. Tanggung Jawab Manajemen dan Pihak yang Bertanggung Jawab atas Tata Kelola terhadap Laporan Keuangan

Manajemen bertanggung jawab atas penyusunan dan penyajian wajar laporan keuangan tersebut sesuai dengan Standar Akuntansi Keuangan di Indonesia, dan atas pengendalian internal yang dianggap perlu oleh manajemen untuk memungkinkan penyusunan laporan keuangan yang bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan.

Dalam penyusunan laporan keuangan, manajemen bertanggung jawab untuk menilai kemampuan Perusahaan dalam mempertahankan kelangsungan usahanya, mengungkapkan, sesuai dengan kondisinya, hal-hal yang berkaitan dengan kelangsungan usaha dan menggunakan basis akuntansi kelangsungan usaha kecuali manajemen memiliki intensi untuk melikuidasi Perusahaan atau menghentikan operasi, atau tidak memiliki alternatif yang realistis selain melaksanakannya.

Pihak yang bertanggung jawab atas tata kelola bertanggung jawab untuk mengawasi proses pelaporan keuangan Perusahaan.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan tersebut.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Sebagai bagian dari suatu audit berdasarkan Standar Audit, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.
- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektivitasan pengendalian internal Perusahaan.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Perusahaan untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor kami ke pengungkapan terkait dalam laporan keuangan atau, jika pengungkapan tersebut tidak memadai, harus menentukan apakah perlu untuk memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Perusahaan tidak dapat mempertahankan kelangsungan usaha.
- Mengevaluasi penyajian, struktur dan isi laporan keuangan secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- *Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.*
- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.*
- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*
- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.*
- *Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.*

- Memperoleh bukti audit yang cukup dan tepat terkait informasi keuangan entitas atau aktivitas bisnis dalam Perusahaan untuk menyatakan opini atas laporan keuangan. Kami bertanggung jawab atas arahan, supervisi dan pelaksanaan audit grup. Kami tetap bertanggung jawab sepenuhnya atas opini audit kami.

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

- *Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.*

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

2. INFORMASI KEBIJAKAN AKUNTANSI MATERIAL (lanjutan)

b. Prinsip atas akuntansi ekuitas

Pengaturan bersama

Berdasarkan PSAK 111, "Pengaturan Bersama", investasi dalam pengaturan bersama diklasifikasikan sebagai operasi bersama atau ventura bersama. Klasifikasi tersebut bergantung pada hak dan kewajiban kontraktual masing-masing investor, bukan pada struktur hukum pengaturan bersama. Pada tanggal 31 Desember 2024, Perusahaan mempunyai pengaturan bersama dalam bentuk ventura bersama.

Ventura bersama

Kepentingan dalam ventura bersama dicatat dengan menggunakan metode ekuitas, setelah pada awalnya diakui sebesar biaya perolehan dalam laporan posisi keuangan.

Sesuai metode ekuitas, investasi pada awalnya dicatat pada biaya perolehan dan selanjutnya disesuaikan untuk mengakui bagian investor atas laba rugi pasca akuisisi dari *investee* atas laba rugi, dan bagiannya dalam pergerakan penghasilan komprehensif lain dari *investee* atas penghasilan komprehensif lain.

c. Transaksi dan saldo dalam mata uang asing

Perusahaan menentukan bahwa mata uang fungsionalnya adalah Rupiah. Transaksi dalam mata uang asing selain Rupiah dicatat berdasarkan kurs yang berlaku pada tanggal transaksi.

Pada tanggal pelaporan, aset dan liabilitas moneter dalam mata uang asing dijabarkan ke Rupiah dengan menggunakan kurs tengah terakhir yang dipublikasikan oleh Bank Indonesia pada periode tersebut. Laba atau rugi selisih kurs yang dihasilkan diakui dalam laba rugi.

***2. MATERIAL ACCOUNTING POLICIES INFORMATION** (continued)*

b. Principles of equity accounting

Joint arrangements

Under SFAS 111, "Joint Arrangements", investments in joint arrangements are classified as either joint operations or joint ventures. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement. As at 31 December 2024, the Company has a joint arrangement in the form of joint ventures.

Joint ventures

Interests in joint ventures are accounted for using the equity method, after initially being recognised at cost in the statement of financial position.

Under the equity method, the investment is initially recognised at cost and adjusted thereafter to recognise the investor's share of the post-acquisition profits or losses of the investee in profit or loss, and its share of movements in other comprehensive income of the investee in other comprehensive income.

c. Transactions and balances in foreign currencies

The Company determines that its functional currency is Rupiah. Transactions in currencies other than Rupiah are recorded ar the prevailing rates of exchange in effect on the date of transactions.

As of reporting date, monetary asset and liabilities denominated in foreign currencies are translated to Rupiah using the last middle exchange rates published by Bank Indonesia on this period. The resulting net foreign exchange gains or losses are recognized in the profit or loss.

2. INFORMASI KEBIJAKAN AKUNTANSI MATERIAL (lanjutan)

c. Transaksi dan saldo dalam mata uang asing (lanjutan)

Transaksi dalam mata uang asing dijabarkan ke dalam mata uang fungsional dengan menggunakan kurs yang berlaku pada tanggal transaksi. Pada setiap tanggal pelaporan, aset dan liabilitas moneter dalam mata uang asing dijabarkan ke dalam mata uang fungsional menggunakan kurs penutup. Keuntungan dan kerugian selisih kurs yang timbul dari penyelesaian transaksi dalam mata uang asing dan dari penjabaran aset dan liabilitas moneter dalam mata uang asing secara umum diakui di dalam laporan laba rugi. Keuntungan atau kerugian ini ditangguhkan di dalam ekuitas jika terkait dengan lindung nilai arus kas dan lindung nilai investasi bersih yang memenuhi syarat atau disebabkan oleh sebagian investasi bersih dalam operasi asing.

d. Kas dan setara kas

Kas dan setara kas dalam laporan posisi keuangan yang terdiri dari kas dan bank serta deposito jangka pendek yang jatuh tempo dalam waktu 3 bulan atau kurang, yang dapat segera dikonversikan menjadi kas dalam jumlah yang dapat ditentukan dan memiliki risiko perubahan nilai yang tidak signifikan dan tidak digunakan sebagai jaminan atas pinjaman dan tidak dibatasi penggunaannya.

Kas dan setara kas yang telah ditentukan penggunaannya atau yang tidak dapat digunakan secara bebas, tidak tergolong dalam kas dan setara kas.

e. Persediaan

Persediaan dinyatakan sebesar nilai yang lebih rendah antara biaya perolehan atau nilai realisasi neto. Biaya perolehan ditentukan dengan menggunakan metode rata-rata bergerak. Nilai realisasi neto persediaan adalah estimasi harga jual dalam kegiatan usaha biasa dikurangi estimasi biaya penyelesaian dan estimasi biaya yang diperlukan untuk membuat penjualan.

Perusahaan menetapkan penyisihan persediaan usang berdasarkan hasil penelaahan berkala atas kondisi fisik dan nilai realisasi neto persediaan.

2. MATERIAL ACCOUNTING POLICIES INFORMATION *(continued)*

21. KOMITMEN DAN KONTINJENSI

Kasus hukum yang menimpa mantan anggota Direksi Perusahaan

Pada Maret 2025, Bapak Aris Toharisman (mantan anggota Dewan Direksi Perusahaan) ditetapkan sebagai tersangka terkait dengan kasus revitalisasi pabrik gula Djatiroto. Kasus hukum ini dimulai pada tahun 2015 ketika PTPN XI menerima Penyertaan Modal Negara (PMN) dari Kementerian Badan Usaha Milik Negara yang kemudian dialokasikan oleh PTPN XI untuk melaksanakan proyek revitalisasi pabrik gula Djatiroto. Proyek revitalisasi di pabrik gula Djatiroto telah mencapai penyelesaian sebesar 86,75% dengan kontrak penghentian pada September 2023, dimana proyek revitalisasi tersebut berakhir sebelum pemisahan tidak murni pabrik gula kepada Perusahaan.

Sampai dengan tanggal laporan keuangan ini diotorisasi, investigasi kasus hukum yang melibatkan Bapak Aris Toharisman masih berlangsung. Perusahaan telah melakukan langkah-langkah investigasi terkait proses pengadaan untuk proyek revitalisasi dan memberikan sanksi untuk pihak-pihak yang terlibat serta telah mendapatkan pandangan hukum dari konsultan hukum. Berdasarkan hal-hal yang telah dilakukan tersebut, Perusahaan berkeyakinan bahwa kasus yang menimpa Bapak Aris Toharisman tersebut tidak memiliki dampak kepada Perusahaan baik secara operasional maupun secara finansial.

Selain hal tersebut di atas, sampai dengan tanggal laporan keuangan ini diotorisasi, proyek revitalisasi dan modernisasi di Pabrik Gula Assembagoes juga sedang dalam penyelidikan oleh Korps Pemberantasan Tindak Pidana Korupsi.

In March 2025, Mr. Aris Toharisman, (a former member of the Company's Board of Directors) was designated as a suspect in connection with the revitalization of the Djatiroto sugar mills. The revitalization project in Djatiroto sugar mills has reached 86.75% completion with termination contract at September 2023, where revitalization project ended prior to the spin-off of the sugar mills to the Company.

As at the authorisation date of this financial statements, the investigating legal case process involving Mr. Aris Toharisman is still ongoing. The Company has taken measures by conducted investigation related to the procurement process for the revitalization project and impose sanctions on the parties involved thus has obtained legal opinions from legal consultants. 22. KELANGSUNGAN USAHA

Laporan keuangan Perusahaan telah disusun berdasarkan prinsip kelangsungan usaha. Kondisi Perusahaan pada 31 Desember 2024 adalah sebagai berikut:

Pada tanggal 31 Desember 2024, liabilitas jangka pendek melebihi aset lancar Perusahaan sebesar Rp 4.858.683. Hal ini terutama disebabkan oleh pinjaman bank sebesar Rp 4.438.226 yang akan jatuh tempo pada tanggal 23 Desember 2025. Kondisi ini menimbulkan keraguan atas kelangsungan usaha Perusahaan.

22. GOING CONCERN

The Company's financial statements have been prepared based on the going concern basis. The Company's conditions as at 31 December 2024 were as follows:

As at 31 December 2024, the Company's current liabilities exceeds its current assets by Rp 4,858,683. This is mainly attributable to the bank loan amounting to Rp 4,438,226 which will be due on 23 December 2025. This condition raises doubts about the Company's ability to continue as a going concern.

22. KEBERLANGSUNGAN USAHA (lanjutan)

Untuk menghadapi kondisi tersebut, manajemen Perusahaan menyusun dan telah melaksanakan rencana strategis sebagai berikut:

i. Perpanjangan jatuh tempo pinjaman bank atau *reprofiling* pinjaman bank

Untuk mengatasi pinjaman bank yang akan jatuh tempo pada tanggal 23 Desember 2025, Perusahaan sedang dalam proses untuk meminta perpanjangan pinjaman bank hingga Desember 2028 dan disaat yang bersamaan sedang mengajukan *reprofiling* pinjaman. Untuk proses perpanjangan pinjaman bank, Perusahaan telah memperoleh persetujuan dari 4 bank anggota sindikasi dan sedang dalam proses untuk mendapatkan persetujuan dari 4 anggota sindikasi lainnya sebelum perpanjangan dapat disetujui. Untuk *reprofiling* pinjaman, Perusahaan telah mendapat kesepakatan dari bank mengenai tenor *reprofiling* pinjaman hingga tahun 2032 dan menambah jumlah fasilitas kredit, sementara persyaratan-persyaratan lain masih sedang dalam proses negosiasi.

ii. Kewajiban keuangan lainnya dan kebutuhan operasional

Untuk memenuhi kewajiban keuangan lainnya dan operasional Perusahaan kedepannya, Perusahaan juga telah menginisiasi beberapa rencana jangka panjang sebagai berikut:

1. Ekspansi area *on farm*.
2. Peningkatan kapasitas.
3. Pembangunan pabrik gula baru.
4. Reaktivasi pabrik gula yang tidak aktif.
5. Pengembangan lahan kemitraan petani.

Rencana-rencana strategis diatas telah disetujui oleh Direksi Perusahaan.

Lebih lanjut, Perusahaan pada tanggal 7 Juli 2025 telah memperoleh surat dukungan keuangan dari PTPN III, pemegang saham mayoritas, yang menyampaikan bahwa:

***22. GOING CONCERN** (continued)*

To deal with this condition, the Company prepared and has been implementing the following strategic plans:

i. The extension of the bank loan maturity or the reprofiling of the bank loan

To address the bank loan that is due on 23 December 2025, the Company is in the process of requesting an extension of the bank loan until December 2028 and simultaneously applying for loan reprofiling. For the bank loan extension process, the Company has obtained approval from 4 syndicated banks and is in the process of securing approval from the other 4 syndicated members before the extension can be approved. For the loan reprofiling, the Company has reached an agreement with the bank regarding the tenor of the loan reprofiling until 2032 and is increasing the amount of credit facilities, while other terms are still under negotiation process.

c) PTPN III will provide financial support to cover any cash shortfalls related to the Company's business activities, operational needs, capital expenditures, and obligations under the Company's syndicated loan agreements.

22. KEBERLANGSUNGAN USAHA (lanjutan)

Manajemen berkeyakinan bahwa Perusahaan akan mampu memenuhi kewajiban keuangannya pada saat jatuh tempo, sehingga Perusahaan akan tetap dapat melangsungkan kegiatan usahanya. Namun demikian, laporan keuangan mengindikasikan adanya ketidakpastian material yang dapat menimbulkan keraguan signifikan terhadap kemampuan Perusahaan untuk mempertahankan kelangsungan usahanya. Laporan keuangan disusun atas dasar kelangsungan usaha dan tidak termasuk penyesuaian yang mungkin timbul dari hasil ketidakpastian.

Asumsi kelangsungan usaha Perusahaan memiliki risiko dan ketidakpastian; sehingga ada kemungkinan bahwa perubahan situasi akan mengubah proyeksi ini, yang selanjutnya dapat mempengaruhi kelangsungan usaha Perusahaan.

22. GOING CONCERN (continued)

Management believes that the Company will be able to meet its financial obligations when they fall due, so the Company will continue as a going concern. Nevertheless, the financial statements indicate that a material uncertainty exists that may cast significant doubt about the Company's ability to continue as a going concern. The financial statements have been prepared on the going concern basis and do not include any adjustments that might result from the outcome of the uncertainties.

The Company's going concern assumptions are subject to risk and uncertainty; hence there is a possibility that changes in circumstances will alter these projections, which may have an impact on the Company's going concern.
